#### Description:

**Abstract:** The seed zones areas within the state that contain genetically similar trees within a species. The zones area designed to give guidance for determining appropriate tree seedling parental source area. The zones were revised in 1996. No species have been completed east of the cascades. Lodgepole pine and black cottonwood are incomplete, and ponderosa pine needs work. When completed the individual files should be merged into a single regions coverage. szitem.txt is the key to file name, species, and field name.
