1. General (GEN) is not a stand structure, but identifies those stands that are not targeted for Layered or Older Forest Structure in the district landscape design.

These stands may develop into any of the five stand structures.

2. The Post Harvest stand structure (except for REG structure) is an estimate of how the stands will develop in five to ten years after the operations are completed.

Acres do not include alternate sales.

1. These are annual estimates from Table 3-6, pg 27) Potential Road Activities FY 2001-2011 of the 2001 District Implementation Plan. **The values here were derived by dividing the values in the Potential Road Activities table by 10.**

2. The road maintenance estimates include only the work to be completed during Fiscal Year 2008 by the district road crew or service contract. Estimates of road maintenance were not projected in the IP.

3. This is a broad estimate of the road maintenance that may be accomplished during the fiscal year, through active commercial operations. However, the exact amount can not be predicted at this time.

1. These columns list the clearcut and partial cut limits identified in the Salmon Anchor Habitat Strategy; not all basins have limits identified for partial cuts. Allowable clearcut acres may be treated as partial cut acres. Allowable partial cut acres may not be treated as clearcut acres. The total management within the SAH basin will be limited to the combined allowable clearcut and partial cut acres.

2. These columns summarize the operations planned and conducted during the period beginning July 1, 2001. This period includes the 2002 through 2008 Fiscal Years.

3. These SAH basins fall in more than one districts. The "Total Acres in Basin" column in the table above are district specific acres. The total management within the basins are in alignment with the Salmon Anchor Habitat Strategies.

4. Basin Plans have been developed for Cedar, Coal, and Cook Creeks, and in the East Fork South Fork Trask, Little North Fork Wilson, and Miami Rivers.

Only includes acres for Primary Operations. Alternate Operations are not included.

Basins with no planned operations for FY2008 are not shown.
