

LIST OF APPENDICES

13 APPENDIX A – SOILS DATA	351
14 APPENDIX B – PHOTOGRAPHIC PLATES.....	355
15 APPENDIX C – WATERSHED ISSUES ORGANIZED BY LAND USE ACTIVITY	383
16 APPENDIX D – NATURAL DISTURBANCE THEORY AND SIMULATION.....	385
THE ROLE OF NATURAL DISTURBANCE IN HUMID TEMPERATE MOUNTAIN LANDSCAPES	385
NATURAL DISTURBANCE IN THE UPPER WILSON RIVER WATERSHED	387
NATURAL DISTURBANCES: SIMULATION RESULTS	388
<i>Fires and Forest Ages: Simulation and Implications for Range of Variability in the Wilson River watershed.....</i>	388
<i>Shallow Landslides and Debris Flows.....</i>	389
<i>Large Wood.....</i>	398
EVALUATING LAND USE DISTURBANCE IN THE CONTEXT OF NATURAL DISTURBANCE.....	401
17 APPENDIX E – DETAILED METHODOLOGIES	405
17.1 STREAM CHANNEL AND CHANNEL MODIFICATION	405
17.1.1 <i>Channel Classification</i>	405
17.1.2 <i>Confluence effects and decay of confluence effects.....</i>	406
17.1.3 <i>Habitat Intrinsic Potential.....</i>	408
17.1.4 <i>Habitat Core Areas</i>	408
17.1.5 <i>Biological Hotspots</i>	409
17.2 HYDROLOGY AND WATER USE, DHSVM MODEL PARAMETERS AND DERIVATIONS	409
17.2.1 <i>Spatial input data</i>	409
17.2.2 <i>Meteorological data</i>	420
17.2.3 <i>Model calibration.....</i>	421
17.3 SEDIMENT SOURCES.....	423
17.3.1 <i>Potential Sediment Yields at the Channel Segment Scale.....</i>	423
17.3.2 <i>Debris Flow Erosional Significance.....</i>	425
17.3.3 <i>Debris Flow Susceptibility (Probability).....</i>	427
17.3.4 <i>Debris Flow Potential for Wood Delivery.....</i>	429
17.3.5 <i>Relationship Between Predicted Debris Flow Susceptibility and Actual Debris Flows... 430</i>	430
17.3.6 <i>Predicting deep-seated landslides</i>	430
18 APPENDIX F – CLASSIFICATION OF STREAM CHANNEL HABITAT TYPES.....	433
18.1.1 <i>Methods</i>	433
18.1.2 <i>Results</i>	433
19 APPENDIX G – CURRENT AND POTENTIAL FUTURE DHSVM VEGETATION TYPES 435	
20 APPENDIX H – DHSVM MODEL CONFIGURATION FILE	437
21 APPENDIX I – DHSVM PEAK FLOW OUTPUT.....	471
22 APPENDIX J – DESIRED FUTURE CONDITIONS	481
PRINCIPLES	482
APPROACH AND AVAILABLE DATA	486
RIPARIAN CONDITIONS	488
<i>Selected Metrics.....</i>	488
<i>Rationale488</i>	
<i>Desired Future Conditions.....</i>	489
AQUATIC CONDITIONS	495
<i>Selected Metrics.....</i>	495
<i>Rationale495</i>	

<i>Desired Future Conditions</i>	495
WATERSHED CONDITION.....	498
<i>Selected Metrics</i> :.....	498
<i>Rationale</i>	498
<i>Desired Future Conditions</i>	500
23 APPENDIX K – RIPARIAN STAND INFORMATION	501
24 APPENDIX L – WOOD RECRUITMENT BUDGET	503
24.1 METHODS.....	503
24.1.1 <i>Preliminaries</i>	503
24.1.2 <i>Wood Inputs by Tree Fall</i>	503
24.2 REFERENCES	506
25 APPENDIX M – ODF ROADS PROTOCOL	511
26 APPENDIX N – LIST OF HYDROLOGICALLY CONNECTED ROADS	529
27 APPENDIX O – JUVENILE SALMONID ABUNDANCES	533
28 APPENDIX P – SUMMARY OF AQUATIC HABITAT CONDITIONS	537
29 APPENDIX Q – FISH BARRIERS	545
30 APPENDIX R – NETMAP ANALYSIS OF CRITICAL ROAD LOCATIONS	553
30.1.1 <i>Methods/Background</i>	553
30.1.2 <i>Results</i>	555
31 APPENDIX S – FIELD VALIDATION OF SOME NETMAP PARAMETERS	557
31.1 METHODS/BACKGROUND.....	557
31.2 RESULTS	557
32 APPENDIX T – SLOPE STABILITY ASSESSMENT	561
32.1 REQUIREMENTS:.....	561
32.2 STRATEGY:.....	561
32.3 BACKGROUND: SLOPE STABILITY	562
32.3.1 <i>Relative landslide density to assess topographic controls on slope stability</i>	562
32.3.2 <i>Model evaluation</i>	565
32.3.3 <i>Translation to hazard classes</i>	566
32.3.4 <i>Data and results for the Wilson River Basin</i>	567
32.3.5 <i>Hazard ratings for landslide initiation</i>	570
32.4 DEBRIS-FLOW RUNOUT.....	570
32.4.1 <i>Topographic factors</i>	570
32.4.2 <i>Model calibration and evaluation</i>	571
32.4.3 <i>Delivery probability</i>	572
32.4.4 <i>Incorporation of delivery probability into hazard ratings</i>	573
32.4.5 <i>Identification of debris-flow-prone Type N channels</i>	574
32.4.6 <i>Debris-Flow-Prone Type F Streams</i>	576
32.5 REFERENCES	578
33 APPENDIX U – MAJOR VEGETATION CLASSIFICATIONS USED IN THE VEGETATION ANALYSIS	581
34 APPENDIX V – LONGITUDINAL T_{MAX} PROFILES FOR ALL PRINCIPAL STREAMS..	583
35 APPENDIX W – LIST OF PRIORITY DISPERSED CREATION SITES FOR UPGRADE OR CLOSURE.....	593
36 APPENDIX X – LIST OF PRIORITY INSPECTION ROADS.....	597

37 APPENDIX Y – ADDITIONAL RIPARIAN MODEL RUN AND MODEL COMPARISONS ...	599
.....	
37.1 POTENTIAL FUTURE CONDITIONS: RIPARIAN MODELING SCENARIOS.....	599
37.1.1 <i>Source Data</i>	600
37.1.2 <i>Canopy Live Tree Density Dynamics (≥ 14 inches DBH)</i>	601
37.1.3 <i>Canopy Mortality Dynamics (≥ 14 inches DBH)</i>	615
37.1.4 <i>Compositional Dynamics</i>	626
37.1.5 <i>Key Findings</i>	628
37.1.6 <i>Conclusions Pertaining to the Watershed Analysis</i>	629
38 APPENDIX Z – MAPS.....	631
