

2006 AOP Public Comments and Responses

West Oregon District

T & E Species Considerations

COMMENT: **Table Mountain** - Partial cut harvesting will degrade M. murrelet habitat and N.S. owl habitat

RESPONSE: The district is following current ODF policy regarding marbled murrelets and northern spotted owls. A biological assessment for this proposed operation has been completed by the Area Biologist. The next step in the evaluation process is consultation with the U.S. Fish and Wildlife Service to address any concerns about an incidental take.
