

Appendix G

Birds: Species List, Status, and Habitat

The following table lists species of birds that are known to be present or are likely to occur on the Elliott State Forest. Biologists at the Oregon Department of Fish and Wildlife exercised their professional judgment in compiling this list. Many of the species are known to occur on the Elliott, based on direct evidence such as sighting or capturing. Other species are included on the list because of indirect evidence such as literature, museum collections, and knowledge of habitat use.

Keys to the “Status” and “Habitat” columns are at the bottom of each page. Species known to be on the Elliott are marked with this symbol: ◆. All other species are likely to occur.
