

HOW TO BECOME A SUBSCRIBER TO RECEIVE NOTIFICATIONS OF OPERATIONS

Forest activities on private lands are regulated by the Oregon Forest Practices Act (FPA). This law requires applicants to notify the State Forester before they begin forest operations. An applicant must file a Notification of Operation form with the Oregon Department of Forestry (ODF) office at least 15 days before the operation starts. Operations include timber harvest, road construction and reconstruction, site preparation, slash treatment, chemical application, land use changes, and certain non-commercial forest activities.

Why Be a Subscriber?

Some citizens are interested in knowing if and when their neighbors are going to start an operation. For absentee landowners, it is an easy way to be informed about forest activities that border your forestland. Others want to review and make comments on planned operations in their watershed.

What Are the Smallest and Largest Areas I Can Subscribe to?

There is a minimum fee of **\$25** for up to five sections, plus \$5 for each section over five. You can also subscribe to an entire District or Unit by paying a maximum fee.

What Does a Subscriber Receive?

Under Option 1, a subscriber receives copies of all notifications of operations, maps, and any required written plans for specific legal descriptions by section. ODF is required to send these documents within six working days after they are submitted. Under Option 2, a subscriber receives the same material for an entire District or Unit. Subscribers who make written comments on plans for operations within 100 feet of Type F (fish bearing) or Type D (domestic use) streams, or within 300 feet of resource sites will want either of these options. Under Option 2a, a subscriber receives only notifications of operations and maps for an entire District or Unit. The subscription is good for one year.

How Do I Become a Subscriber?

Use the application form on the following page to choose an option and identify areas for which you are interested in receiving notifications of operation and to calculate the appropriate fees.
