Approve minutes for March 18, 2005

No Quorum: Tabled for next meeting

STIP Criteria 2008 – 2011 by Mike Stinson & Jim Bryant

- Discussion of Current STIP's in operation
- Reviewed STIP Criteria for Eligibility
- Discussion of current projects in Klamath Falls – will they meet the needs of traffic flow for the projected 10 yr. period.

Discussion of Impending Projects by Ernest Palmer

- During Washburn Way Bridge reconstruction – Intersection at Eberlein and Alameda Bypass needs to have some kind of traffic control. People driving from Vandenburg and the YMCA use it a lot. Look at cost to install a temporary signal. Predicted traffic pattern is to flow down Shasta, but this intersection also needs to be considered as a primary flow.

Public Comments

- Current construction projects need some spot checks to determine if traffic control needs are being handled appropriately.

Adjourn by Common Consent of those Attending

11:15 P.M.
