

Background

2001—2011: A Decade of Transportation Infrastructure Reinvestment

Oregon Transportation Investment Act

OTIA projects have strengthened Oregon’s bridges, decreased congestion, improved safety, and helped keep thousands of Oregonians employed.

Oregon firms have received about 85 percent of bridge program expenditures. As of October 2011, the OTIA III bridge program has sustained more than 18,000 jobs since it began.

ConnectOregon

ConnectOregon has provided \$340 million in lottery-backed bonds for more than 170 multimodal projects—improving connections and expanding our options by investing in rail, public transit, marine/ports and air transportation projects.

Ranging from repaired railroad tracks to upgraded marine piers, from new transit centers to improved aviation communications equipment, these non-highway projects make Oregon better for people and business.

Jobs and Transportation Act

The Jobs and Transportation Act, passed by the 2009 Oregon Legislature, improves all modes of Oregon’s transportation system through a variety of programs. It raises about \$300 million per year for highways, county roads and city streets. The JTA identified 37 specific state highway projects and allocated funding to 12 local governments in Eastern Oregon.

American Recovery and Reinvestment Act

ARRA invested half a billion dollars in Oregon’s surface transportation system during the Great Recession, funding more than 200 projects of all types and sizes across the state. Large and small employers working on ARRA projects helped hard-hit communities by employing local residents and supporting local businesses.
