

TABLE OF CONTENTS

INTRODUCTION

Preface

Record of Revisions

Organization of the Manual

Revising the Manual

SECTION 1: OFFICE ORGANIZATION AND PERSONNEL POLICIES

1.1 Who Are We and What Do We Do

1.1.1 The Section's Mission, Key Values, Goals, and Organization

1.1.1.1 Mission

1.1.1.2 Key Values

1.1.1.3 Goals

1.1.1.4 Bridge Engineering Section Organization

1.1.2 The Section's Responsibilities

1.1.2.1 Administrative Support Team

1.1.2.2 Structural Design Teams

1.1.2.3 Preservation Engineering Team

1.1.2.4 Bridge Operations Team

1.1.3 The Team Concept

1.1.3.1 The Section's Basic Crews/Teams

1.1.3.2 The Section's Managerial Teams

1.2 Getting Acquainted/Office Routine

1.2.1 What's Where

1.2.1.1 Units and Services in the Transportation Building

1.2.1.2 Bridge Engineering Section Floor Plan

1.2.1.3 Salem Area Map

1.2.1.4 Capitol Mall Area Map

1.2.1.5 East Highway Complex Area Map

1.2.1.6 East Highway Materials Area Map

1.2.1.7 Regions/Districts Map

1.2.2 New Employee Orientation

1.2.2.1 Who is involved?

1.2.2.2 What is involved?

1.2 Getting Acquainted/Office Routine – (continued)

1.2.3 Personnel Matters and Working Conditions

- 1.2.3.1 Personnel Policies
- 1.2.3.2 Employee Evaluation
- 1.2.3.3 Employee Recognition
- 1.2.3.4 A Question of Ethics
- 1.2.3.5 Employee Organizations
- 1.2.3.6 To Your Health

1.2.4 Time Records and Other Work Routines

- 1.2.4.1 Work Schedule
- 1.2.4.2 Time Reports
- 1.2.4.3 Payroll Time Sheets and Pay Day
- 1.2.4.4 Private Mail and Phone Calls
- 1.2.4.5 Building Security and the Evacuation Plan
- 1.2.4.6 Parking
- 1.2.4.7 The Commute to Work by Carpool, Bus, and Bike

1.2.5 Making Copies and Prints

- 1.2.5.1 Office Copy Machine
- 1.2.5.2 Department of Administrative Services Mall Copy Center
- 1.2.5.3 ODOT Reprographics and Design Services

1.2.6 Office/Field Equipment and Supplies

- 1.2.6.1 Who Provides What
- 1.2.6.2 Supply Cabinets and Equipment Lockers
- 1.2.6.3 Forms
- 1.2.6.4 Equipment Loaned by Information Resource Center
- 1.2.6.5 Surplus Property Store

1.2.7 Field Trips and Traveling

- 1.2.7.1 Traveling for ODOT
- 1.2.7.2 State Shuttle Services
- 1.2.7.3 Driving a State Vehicle
- 1.2.7.4 Use of Private Vehicle for Public Business
- 1.2.7.5 Field Trip Paperwork

1.3 Sources of Information

1.3.1 Bridge Engineering Section Files

- 1.3.1.1 Use-of-Files Etiquette
- 1.3.1.2 General Files
- 1.3.1.3 Project Files
- 1.3.1.4 Drawing Files
- 1.3.1.5 Bridge Management and Maintenance Files
- 1.3.1.6 Product Information File
- 1.3.1.7 State Archives and Records Center

1.3 Sources of Information – (continued)

1.3.2 Bridge Engineering Section Committees and Specialists

- 1.3.2.1 Technical and Personnel Committees
- 1.3.2.2 Special Assignments
- 1.3.2.3 Design, Computer, and Product Specialties
- 1.3.2.4 ATE Drafter Specialties

1.3.3 Libraries and Other Information Centers

- 1.3.3.1 Team and Unit Libraries
- 1.3.3.2 Bridge Engineering Section Library
- 1.3.3.3 ODOT Library
- 1.3.3.4 ODOT General Files and History Center
- 1.3.3.5 Oregon Technology Transfer Center
- 1.3.3.6 State Library

1.4 Communications

1.4.1 Correspondence

- 1.4.1.1 Correspondence Overview
- 1.4.1.2 Letters
- 1.4.1.3 Memorandums
- 1.4.1.4 Reports

1.4.2 Facsimile Communication (FAX)

1.4.3 Telephone

1.4.4 Mail

1.4.5 Crew Meetings

1.4.6 Bulletin Boards and Pass-Around Information

1.4.7 Newsletters

1.5 Employee Training and Career Development

1.5.1 Training Responsibilities

- 1.5.1.1 You and Your Supervisor
- 1.5.1.2 Training Committee
- 1.5.1.3 Training Coordinator
- 1.5.1.4 Human Resource Development Unit

1.5.2 Training Information

- 1.5.2.1 Training Catalogs and Announcements
- 1.5.2.2 Human Resource Development System and Your Training Record

1.5.3 Basics of the Training Program

- 1.5.3.1 Types of Training
- 1.5.3.2 Section's Training Budget
- 1.5.3.3 Training Eligibility
- 1.5.3.4 Training Reimbursement Guidelines

1.5 Employee Training and Career Development - (continued)

1.5.4 Employee Development Plan

1.5.5 Applying for Courses

- 1.5.5.1 In-House Training Applications
- 1.5.5.2 External Training Applications
- 1.5.5.3 Out-of-State Training Applications
- 1.5.5.4 Modified Application Procedure

1.5.6 After Completing a Course

- 1.5.6.1 Training Entries for Time Report
- 1.5.6.2 Employee Development Report
- 1.5.6.3 Training Reimbursement Requests

1.5.7 Employee Rotational Programs

- 1.5.7.1 Graduate Engineer Program
- 1.5.7.2 Developmental Assignment Program

1.5.8 ODOT Mentor Program

1.6 Bridge Engineering Section Emergency Plan Procedures

1.6.1 Bridge Engineering Section's Responsibilities

1.6.2 Definitions of Levels of Emergencies

- 1.6.2.1 Isolated Incidents
- 1.6.2.2 Widespread Incidents

1.6.3 Who to Call

1.6.4 Initial Response by Region

1.6.5 Response by Bridge Engineering Section

- 1.6.5.1 Response to Isolated Incidents
- 1.6.5.2 Response to Widespread Incidents

1.6.6 Available Bridge Engineering Section Resources

- 1.6.6.1 File Documents
- 1.6.6.2 Technical Specialists
- 1.6.6.3 List of Emergency Teams
- 1.6.6.4 Underwater Inspection Equipment

Section 1 Appendix

Glossary

- Definitions
- Abbreviations (Initialisms and Acronyms)

SECTION 2: DESIGN PHASES AND RESPONSIBILITIES

- 2.1 Design Phases and Responsibilities, General
 - 2.1.1 Introduction to Structure Design
 - 2.1.2 Structure Design References
 - 2.1.2.1 Standard Specifications and Standard Drawings Manuals
 - 2.1.2.2 Other Design Specifications, Manuals, and References
 - 2.1.3 For the Record
 - 2.1.3.1 Communicating with the Outside
 - 2.1.3.2 Reminders about Original Documents
 - 2.1.3.3 Informal Memos
 - 2.1.3.4 Template File List
 - 2.1.3.5 Professional Engineer Seal and Title
 - 2.1.3.6 Comments about Drawings
 - 2.1.4 Design Computer System and Software
 - 2.1.5 Design Calculations
 - 2.1.5.1 Importance of Calculations
 - 2.1.5.2 A Set of Calculations
 - 2.1.5.3 Calculation Book Cover Sheet
 - 2.1.5.4 Calculation Sheets
 - 2.1.5.5 Other Calculation Material
 - 2.1.5.6 Temporary Storage of Unbound Calculations
 - 2.1.6 Calculation Books
 - 2.1.6.1 The Basics
 - 2.1.6.2 Calculation Book Numbers
 - 2.1.6.3 What Goes in Calculation Books?
 - 2.1.6.4 Table of Contents
 - 2.1.6.5 Page Numbering
 - 2.1.6.6 Examples of Calculation Book Format
 - 2.1.6.7 Binding and Storing Calculation Books
 - 2.1.7 Tracking Design Costs
 - 2.1.8 Measuring Design Productivity
 - 2.1.9 Special Considerations for Federal-Aid Projects
 - 2.1.9.1 Alternative Designs
 - 2.1.9.2 Large or Unusual Structures
 - 2.1.9.3 Experimental Features Program
 - 2.1.9.4 Specifying Proprietary Items
 - 2.1.10 Other Design Considerations
 - 2.1.10.1 Evaluation of Construction/Maintenance Products
 - 2.1.10.2 County and City Bridges
 - 2.1.10.3 Free Bridge Design
 - 2.1.10.4 Value Engineering
 - 2.1.10.5 Railroad Bridge Design

- 2.1 Design Phases and Responsibilities, General – (continued)
 - 2.1.11 Organizing for Large Design Projects
 - 2.1.11.1 Lead Personnel for Large Projects
 - 2.1.11.2 Design Team Supervisor's Responsibilities
 - 2.1.11.3 Lead Designer's Duties
- 2.2 Job Setup
 - 2.2.1 The Project Development Pipeline
 - 2.2.1.1 Project Development Overview
 - 2.2.1.2 Filing Early Project Information
 - 2.2.2 Important Preliminary Documents
 - 2.2.2.1 Project Prospectus
 - 2.2.2.2 Vicinity Map Information
 - 2.2.2.3 Location Narrative
 - 2.2.2.4 Bridge Project Prospectus Estimate
 - 2.2.2.5 Hydraulics Report
 - 2.2.2.6 Foundation Report
 - 2.2.3 Bridge Preliminary Design Tasks
 - 2.2.3.1 Activation of a Project
 - 2.2.3.2 Gathering Project Information
 - 2.2.3.3 Preliminary Site Inspection
 - 2.2.3.4 Coordination with Regions
 - 2.2.3.5 Completing Bridge Project Prospectus Estimate
 - 2.2.3.6 Location Narrative Review
 - 2.2.3.7 Request for Bridge Number
 - 2.2.3.8 Job Record Sheet
 - 2.2.3.9 Preparing and Processing Job Record Folder
- 2.3 Type, Size, and Location (TS&L) Design
 - 2.3.1 TS&L Design, General
 - 2.3.1.1 What is a TS&L Design?
 - 2.3.1.2 TS&L Design Aids
 - 2.3.1.3 Contact with Roadway Designer
 - 2.3.1.4 TS&L Design Field Trips
 - 2.3.2 Things to Keep in Mind
 - 2.3.2.1 Structure Appearance and Aesthetics
 - 2.3.2.2 Traffic Handling and Data
 - 2.3.2.3 Bikeways
 - 2.3.2.4 Protection of Recreational/Cultural Resources
 - 2.3.2.5 Right-of-Way
 - 2.3.2.6 Utilities
 - 2.3.3 Permits - Potential Trouble!
 - 2.3.3.1 Permit Applications
 - 2.3.3.2 Three Major Permits
 - 2.3.3.3 Other Permits
 - 2.3.4 Before You Start
 - 2.3.4.1 Review of Job Record Folder and Files
 - 2.3.4.2 Review of Project Design Standards and Geometry

2.2 Job Setup – (continued)

2.3.5 Fundamental Decisions for Bridge Designs

- 2.3.5.1 Bridge Length
- 2.3.5.2 Structure Layout: Spans and Proportions
- 2.3.5.3 Structure Types and Economics
- 2.3.5.4 Substructure Choices

2.3.6 Other Bridge Design Considerations

- 2.3.6.1 Bridge Rail
- 2.3.6.2 Bridge End Panels and Supports
- 2.3.6.3 Slope Paving/Railroad Slope Protection
- 2.3.6.4 Corrosion Protection Concerns
- 2.3.6.5 Bridge Widening and Deck Overlays

2.3.7 Working with Miscellaneous Structures

2.3.8 TS&L Design End Products

- 2.3.8.1 TS&L Plan and Elevation Drawing
- 2.3.8.2 TS&L Estimate
- 2.3.8.3 TS&L Narrative

2.3.9 Processing the TS&L Design Package

- 2.3.9.1 Submittal for Approval
- 2.3.9.2 Distribution to Outside Reviewers

2.4 Final Design

2.4.1 Final Design, General

- 2.4.1.1 The Last Phase
- 2.4.1.2 Guides for Final Design
- 2.4.1.3 Final Design Timetable

2.4.2 Getting Started

2.4.3 Final Estimate

- 2.4.3.1 What Will it Cost?
- 2.4.3.2 Notes About Bid Items and Estimating
- 2.4.3.3 Mobilization, E&C, and Square-Foot Costs
- 2.4.3.4 Processing Unchecked Final Estimate
- 2.4.3.5 Checking Final Estimate
- 2.4.3.6 Final Estimate Revisions
- 2.4.3.7 Processing Checked Final Estimate

2.4.4 Bikeway/Pedestrian Path Allocation

- 2.4.4.1 Who Needs to Know?
- 2.4.4.2 Computing Bikeway Quantities

2.4.5 Special Provisions

- 2.4.5.1 Where to Begin
- 2.4.5.2 Special Provision Guides
- 2.4.5.3 Processing Special Provisions

2.4 Final Design – (continued)

2.4.6 Bridge Construction Time Estimate

2.4.7 Construction Assistance Estimate

2.4.8 Review Plans

- 2.4.8.1 What are Preliminary Plans?
- 2.4.8.2 Internal Review of Preliminary Plans
- 2.4.8.3 Processing Preliminary Plans
- 2.4.8.4 What are Advance Plans
- 2.4.8.5 Processing Advance Plans
- 2.4.8.6 Review of Roadway Plans

2.4.9 Design Check

- 2.4.9.1 Design Checker Assignment
- 2.4.9.2 Class I Check
- 2.4.9.3 Class II Check

2.4.10 Processing Final Plans

- 2.4.10.1 Getting Plans Signed
- 2.4.10.2 Last-Minute Changes

2.5 Bridge Load Rating

2.5.1 The Why and Who of Load Rating

2.5.2 Where to Look for Help

2.5.3 Vehicles for Load Rating

- 2.5.3.1 MS Loadings
- 2.5.3.2 Standard Legal and Permit Loadings

2.5.4 Basic Terminology

- 2.5.4.1 Rating Factor
- 2.5.4.2 Inventory Rating
- 2.5.4.3 Operating Rating

2.5.5 What! No Bridge Plans?

2.6 Procedures for Standard Drawings

- 2.6.1 Who's Responsible for Standard Drawings?
- 2.6.2 Use of Standard Drawings
- 2.6.3 Standard Drawing Files
- 2.6.4 Developing New Standard Drawings
- 2.6.5 Revising Standard Drawings
- 2.6.6 Distributing Standard Drawings

2.7 Review of Consultant Plans (To be issued in the future)

Section 2 Appendix

SECTION 3: CONSTRUCTION AND MAINTENANCE

3.1 Construction Phase

3.1.1 Introduction

3.1.2 Construction Phase Communications

3.1.2.1 Construction Phase Communications, General

3.1.2.2 Project Discussion Memos

3.1.2.3 Design and Plan Revisions after Letting

3.1.2.4 Construction Project Status Reports

3.1.2.5 Coast Guard Permit Reports

3.1.3 Construction Phase Field Trips

3.1.3.1 Informational

3.1.3.2 Construction Problems

3.1.3.3 Final Walk-through

3.1.4 Structure Cost Data Preparation

3.1.5 Design Cost Data Preparation

3.1.6 Disposition of Job Record Folder

3.1.6.1 General

3.1.6.2 Overhead Sign Inventory

3.1.6.3 Bridge Rail Data Sheet

3.1.6.4 Impact Attenuator Data Sheet

3.1.6.5 Seismic Design/Retrofit Data Sheet

3.1.7 Handling Construction Problems

3.1.7.1 Responding to Problems

3.1.7.2 Price Agreement Reviews

3.1.8 Working Drawings

3.1.8.1 Working Drawings, General

3.1.8.2 Processing Working Drawings

3.1.8.3 Shop Drawings

3.1.8.4 Checking Shop Drawings

3.1.8.5 Temporary Construction Drawings

3.1.8.6 Checking Temporary Construction Drawings

3.1.9 Construction Narrative Review

3.1.10 As Constructed Drawings

3.2 Maintenance

3.2.1 Introduction

3.2.2 Permit Load Review

Section 3 Appendix

SECTION 4: DRAFTING PRACTICES

- 4.1 Computer Aided Drafting (CAD)
 - 4.1.1 Directory Setup
 - 4.1.2 Cell Libraries
 - 4.1.3 Menus
 - 4.1.4 Tutorials
 - 4.1.5 Seed Files
 - 4.1.6 Scales
- 4.2 Detailing
 - 4.2.1 Text
 - 4.2.2 Linework
 - 4.2.3 Dimensioning
 - 4.2.4 Concrete
 - 4.2.5 Structural Steel
 - 4.2.6 Reinforcing Steel
 - 4.2.7 Bar Length Labeling
- 4.3 Drawing Borders
 - 4.3.1 Drawing Identification Tag
- 4.4 Title Block Information
 - 4.4.1 Request for Drawing Numbers
 - 4.4.2 Title Sheet
 - 4.4.3 Detail Sheet
 - 4.4.4 Foundation Data Sheet
- 4.5 Lead Drafters Duties on Large Projects
- 4.6 Type, Size, and Location Plan & Elevation
 - 4.6.1 Plan
 - 4.6.2 Location Map
 - 4.6.3 Clearance Diagrams

- 4.7 Final Plans
 - 4.7.1 Layout for Large Projects
 - 4.7.2 Final Plans, General
 - 4.7.3 Plan and Elevation
 - 4.7.3.1 Plan
 - 4.7.3.2 Elevation
 - 4.7.3.3 Hydraulic Data
 - 4.7.3.4 General Notes
 - 4.7.3.5 Gradeline and Superelevation Diagrams
 - 4.7.3.6 Military Loading
 - 4.7.3.7 Utilities and Right-of-Way
 - 4.7.3.8 Railroad Clearance Diagram
 - 4.7.3.9 Construction Clearance Diagram
 - 4.7.4 Foundation Data Sheet
 - 4.7.5 Footing Plan
 - 4.7.6 Deck Plan
 - 4.7.7 Superstructure Details
 - 4.7.7.1 General
 - 4.7.7.2 Superstructure Sections
 - 4.7.7.3 Diaphragm and Cross-Beam Details
 - 4.7.7.4 Longitudinal Beam Elevation Views
 - 4.7.8 Bent Details
 - 4.7.8.1 General
 - 4.7.8.2 Plan View
 - 4.7.8.3 Elevation
 - 4.7.8.4 Footing Plan
 - 4.7.8.5 Details
 - 4.7.9 Miscellaneous Details
 - 4.7.10 Plans "For Information Only"
 - 4.7.11 Revisions
- 4.8 Plotting
- 4.9 Transfer of Electronic Files to Consultants
- 4.10 Archiving CAD Files

Section 4 Appendix

SECTION 5: DESIGN AND DETAILING PRACTICES

- 5.1 Structure Design and Detailing
 - 5.1.1 Foundation and Hydraulic Considerations
 - 5.1.1.1 Foundations and Hydraulics, General
 - 5.1.1.2 Lateral Earth Restraint
 - 5.1.1.3 Cofferdams
 - 5.1.2 Foundation Modeling (Footing Springs)
 - 5.1.2.1 General Modeling Techniques
 - 5.1.2.2 General Procedures and Typical Values
 - 5.1.2.3 Drilled Shaft Modeling (Fully Coupled)
 - 5.1.3 Piling
 - 5.1.3.1 Capacities, General
 - 5.1.3.2 Group Pile Loading
 - 5.1.3.3 Test Piles
 - 5.1.3.4 Pile Uplift
 - 5.1.3.5 Precast Prestressed Piling
 - 5.1.3.6 Pile Tip Reinforcement
 - 5.1.3.7 Steel Pile Embedment to Develop Fixity
 - 5.1.3.8 Steel Pile Splices
 - 5.1.3.9 Anchor Piles
 - 5.1.4 Underwater Construction
 - 5.1.4.1 Underwater Foundation Design Considerations
 - 5.1.4.2 Footing Embedment
 - 5.1.4.3 Cofferdams and Seals
 - 5.1.5 Loads and Distribution
 - 5.1.5.1 Dead Loads
 - 5.1.5.2 Live Loads
 - 5.1.5.3 Thermal Forces
 - 5.1.6 End Bents
 - 5.1.6.1 Determining Bridge Length
 - 5.1.6.2 Wingwall Location
 - 5.1.6.3 Wingwall Design and Construction
 - 5.1.6.4 End Bents
 - 5.1.6.5 Strutted Abutments
 - 5.1.6.6 Architectural Treatments
 - 5.1.6.7 Pile Cap Abutment Details
 - 5.1.6.8 Abutment Details for Prestressed Slabs
 - 5.1.6.9 Forming of Backwalls for End Beams
 - 5.1.6.10 Bent Joint Details
 - 5.1.6.11 Backwall Reinforcement for Post-tensioned Structures
 - 5.1.6.12 Beam Seat Drainage
 - 5.1.6.13 Reinforced Concrete End Panels
 - 5.1.6.14 Bent Width Provisions with Precast Units

5.1 Structure Design and Detailing – (continued)

5.1.7 Interior Bents

- 5.1.7.1 Interior Bents, Design and Detailing
- 5.1.7.2 Interior Bent Details for Prestressed Slabs
- 5.1.7.3 Structure Widening, Interior Bents
- 5.1.7.4 Columns in Slopes
- 5.1.7.5 Column Design, General
- 5.1.7.6 Spiral Reinforcing
- 5.1.7.7 Column Steel Clearance in Footings
- 5.1.7.8 Column Hoops
- 5.1.7.9 Vertical Bar Splices
- 5.1.7.10 Optional Hoop Detail at Bottom of Columns
- 5.1.7.11 Footing Reinforcing
- 5.1.7.12 Sloped Footings

5.1.8 Seismic Design

- 5.1.8.1 Seismic Design, General
- 5.1.8.2 Specification Interpretations and Modifications
- 5.1.8.3 Detailing
- 5.1.8.4 Structure Modeling
- 5.1.8.5 Footing/Pile Cap Design
- 5.1.8.6 Costs
- 5.1.8.7 Instrumentation
- 5.1.8.8 Dynamic Isolators

5.1.9 Seismic Restrainer Design (New Designs and Retrofits)

- 5.1.9.1 Seismic Restrainer Design, General
- 5.1.9.2 Information for Restrainer Design
- 5.1.9.3 Longitudinal Restrainer Design
- 5.1.9.4 Transverse Restrainer Design
- 5.1.9.5 Hold-downs
- 5.1.9.6 Use of State Stockpile Cable for Seismic Retrofit

5.1.10 Reinforcement

- 5.1.10.1 Reinforcement, General
- 5.1.10.2 Bar Lengths
- 5.1.10.3 Interim Reinforcement for T-Beams and Box Girders
- 5.1.10.4 Additional Shear Reinforcement
- 5.1.10.5 Diaphragm Beam Steel
- 5.1.10.6 Additional Shear Reinforcement in Longitudinal Girders

5.1.11 Precast Prestressed Concrete Elements

- 5.1.11.1 Design and Detailing of Prestressed Slabs and Box Beams
- 5.1.11.2 Design and Detailing of Precast Prestressed Beams

5.1 Structure Design and Detailing – (continued)

5.1.12 Cast-in-Place Superstructure

- 5.1.12.1 General Design
- 5.1.12.2 Interim Reinforcement for T-Beams
- 5.1.12.3 Diaphragm Beam Steel
- 5.1.12.4 Box Girder Stem Flare
- 5.1.12.5 Shear Keys and Construction Joints
- 5.1.12.6 Access Holes
- 5.1.12.7 Bottom Slab Details
- 5.1.12.8 Cross Beams
- 5.1.12.9 Concrete Repair (Bonding Agents)
- 5.1.12.10 Structure Widening
- 5.1.12.11 Stay-in-Place Forms for Deck

5.1.13 Post-Tensioned Structures

- 5.1.13.1 General Design
- 5.1.13.2 General Details
- 5.1.13.3 Post-tensioned Deck Overhangs
- 5.1.13.4 Stress Rod Reinforcement of Bearing Seats
- 5.1.13.5 Segmental Construction
- 5.1.13.6 Support Tower Details and Notes
- 5.1.13.7 Reinforcement of Deck Overhangs
- 5.1.13.8 Post-tensioned Strand Duct Placement

5.1.14 Camber Diagrams

- 5.1.14.1 Camber Diagrams, General
- 5.1.14.2 Precast Slabs and Box Beams
- 5.1.14.3 Precast Beams

5.1.15 Pour Schedules

- 5.1.15.1 Pour Schedules, General
- 5.1.15.2 T-Beams Supported on Falsework
- 5.1.15.3 Box Girders on Falsework
- 5.1.15.4 Drop-in Precast Prestressed Elements
- 5.1.15.5 Continuous Cast-in-Place Slabs on Falsework
- 5.1.15.6 End Bents
- 5.1.15.7 Steel Girders

5.1.16 Concrete

- 5.1.16.1 Concrete, General
- 5.1.16.2 Concrete Finish

5.1.17 Bearings

- 5.1.17.1 Elastomeric Bearing Pads
- 5.1.17.2 Proprietary Pot, Disc, Slide, Radial, or Spherical Bearings
- 5.1.17.3 Expansion Bearing File
- 5.1.17.4 Bearing Replacement
- 5.1.17.5 Reinforced Concrete Bearing Seats
- 5.1.17.6 Unreinforced Bearing Seats (P/S Slabs and Box Beams)

5.1 Structure Design and Detailing – (continued)

5.1.18 Deck Design and Detailing

- 5.1.18.1 Deck Design and Detailing
- 5.1.18.2 Deck Expansion Joint Seals
- 5.1.18.3 Deck Drainage
- 5.1.18.4 Deck Screeding
- 5.1.18.5 Deck Overlays
- 5.1.18.6 Deck Construction Joints

5.1.19 Bridge Rail

- 5.1.19.1 Rail Selection
- 5.1.19.2 Rail Retrofit Guidelines
- 5.1.19.3 Joints in Bridge Rail
- 5.1.19.4 Temporary Barriers

5.1.20 Drilling Holes in Concrete

5.1.21 Drilled Concrete Anchors

- 5.1.21.1 Materials
- 5.1.21.2 Design
- 5.1.21.3 Plan Details

5.1.22 Anchor Bolts

- 5.1.22.1 Materials
- 5.1.22.2 Anchor Bolt Sleeves

5.1.23 Corrosion Protection

- 5.1.23.1 Marine Environment
- 5.1.23.2 Marine Environment Protection
- 5.1.23.3 Non-marine Environment Protection
- 5.1.23.4 Waterproofing Membranes

5.2 Steel Structure Design and Detailing

5.2.1 Steel Girders

- 5.2.1.1 Material Identification
- 5.2.1.2 Shop Lengths of Welded Girders
- 5.2.1.3 Intermediate Cross Frames
- 5.2.1.4 Intermediate Web Stiffeners
- 5.2.1.5 Bearing Stiffeners
- 5.2.1.6 Earthquake Restraint Details
- 5.2.1.7 Composite Action and Flange Shear Connectors
- 5.2.1.8 Beam Camber
- 5.2.1.9 Deck Pouring Sequence
- 5.2.1.10 Expansion Joint Blockouts
- 5.2.1.11 Bearings
- 5.2.1.12 Structure Widening

5.2 Steel Structure Design and Detailing – (continued)

5.2.2 Welding

- 5.2.2.1 Welding, General
- 5.2.2.2 Fillet Welds
- 5.2.2.3 Flange Welds

5.2.3 Sign, Signal and Luminaire Supports

- 5.2.3.1 Cantilever Supports
- 5.2.3.2 Sign Bridges
- 5.2.3.3 Structure Mounts
- 5.2.3.4 Sign Support Inventory

5.2.4 Galvanizing

- 5.2.4.1 Processes
- 5.2.4.2 Detailing
- 5.2.4.3 Silicon Control

5.2.5 Cables and Turnbuckles

- 5.2.5.1 Cables and Turnbuckles, General
- 5.2.5.2 General Notes for Cables and Turnbuckles
- 5.2.5.3 Special Provisions for Cables
- 5.2.5.4 Special Provisions for Turnbuckles
- 5.2.5.5 Design Properties

5.2.6 Bolts and Connections

- 5.2.6.1 High Strength Bolts
- 5.2.6.2 Anchor Bolts

5.3 Timber Bridge Design and Detailing

5.3.1 Timber Bridge Locations

5.3.2 Timber Design and Details

5.3.3 Timber Connections

5.3.4 Timber Rails

5.3.5 Preservative Treatments

5.3.6 Field Installation

5.4 Miscellaneous Structure Design and Detailing

5.4.1 Retaining Structures

- 5.4.1.1 Retaining Structures, General

5.4.2 Soundwalls

- 5.4.2.1 Soundwalls, General
- 5.4.2.2 Seismic Load
- 5.4.2.3 Factor of Safety Against Overturning
- 5.4.2.4 Pay Limits for Soundwalls

5.4 Miscellaneous Structure Design and Detailing – (continued)

5.4.3 Impact Attenuators or Crash Cushions

5.4.3.1 Attenuator Design

5.4.3.2 Chevrons

5.4.4 Safety and Accessibility Requirements

5.4.4.1 Uniform Accessibility Standards

5.4.4.2 Inspection and Maintenance Accessibility

5.4.4.3 Concrete Box Girder Access and Form Removal

5.4.4.4 Standard Access and Ventilation in Concrete Box Girders

5.4.4.5 Sign Structure Maintenance Walkways

5.4.4.6 Protective Screening

5.4.5 Culvert Design

5.4.5.1 Culvert Design, General

5.4.5.2 Box Culverts

5.4.5.3 Pipe Arches

5.4.6 Bridge Name Plates

5.4.6.1 Existing Name Plates

5.4.7 Utilities on Structures

5.4.7.1 Utilities on Structures, General

5.4.7.2 Providing for Utility Installations

5.4.7.3 Detailing Guidelines

5.4.7.4 Special Utility Considerations

5.4.7.5 Attachments to Existing Structures

5.4.8 Structure Clearances

5.4.8.1 Roadway Clearances

5.4.8.2 Railroad Clearances

5.4.9 Bridge Temporary Works

5.4.9.1 Introduction

5.4.9.2 Cofferdams

5.4.9.3 Shoring

5.4.9.4 Falsework

5.4.10 Temporary Detour Bridges

5.4.11 Placing Buildings Below O.D.O.T. Bridges

5.5 Metric Conversion

5.5.1 Introduction

5.5.2 Basic Units

5.2.2.1 Decimal Prefixes

5.5.3 Derived Units

5.5.3.1 Force

5.5.3.2 Stress

5.5.3.3 Energy

5.5.4 Metric Conversion Factors

5.5.5 Metric Procedural Rules

5.5.5.1 Writing Metric Symbols and Names

5.5.5.2 Writing Numbers

5.5.5.3 Conversions and Rounding

5.5.6 Bridge Plan Preparation Guide

5.5.6.1 Plan Dimensions

5.5.6.2 Reinforcing Steel

5.5.6.3 Fasteners

5.5.6.4 Structural Steel

5.5.7 Miscellaneous Common Conversions

5.6 ODOT Design Instructions for AASHTO Standard Specifications for Highway Bridges

5.7 ODOT Design Instructions for AASHTO LRFD Bridge Design Specifications

Section 5 Appendix
