

Standard Guidelines for Product Review

Coating for Rebar, Epoxy;

Section 02510.11

May 5, 2003

02510.11 – Epoxy Coating for Rebar

ODOT maintains a list of products suitable for placement on rebar to resist corrosion. These are factory applied products, and not suitable for field applications.

Specifications: AASHTO M284

To apply for inclusion on the QPL, submit the following:

- Preliminary information for Product Evaluation Form.
- Independent test results showing compliance with AASHTO M284.
- Current, legible copy of the MSDS.
- Copy of your Quality Control program.
- Spec data sheet.
- Name of approved patching material.
- List of limitations and precautions.

Submit documentation to:

Oregon DOT
