02060.00 – Concrete Sealer, Chloride Barrier

ODOT maintains a list of products suitable for placement on concrete to seal the sides and underneath of concrete structures against chloride intrusion. We have found the program developed by the Province of Alberta (for northern exposures) in conjunction with a requirement for minimum silane content meets our needs. Products shall be VOC compliant.

To Apply for inclusion on the QPL, submit the following:

- Preliminary information for Product Evaluation Form.
- Documentation showing silane content of at least 40%.
- Documentation showing VOC compliance.
- Spec data sheet with a list of limitations and precautions.
- Detailed installation instructions.
- MSDS
- Copies of approval from the Province of Alberta.
