Concrete Modifier – GGBF Slag

ODOT keeps a list of Ground, Granulated, Blast-Furnace (GGBF) Slag. It is used to increase the durability of the concrete.

Specifications - We require the product to comply with AASHTO M 302.

To apply for inclusion on the QPL, submit the following:

- [Preliminary Information for Product Evaluation Form](#).
- Independent test results of representative samples showing compliance with specifications listed above.
- Send us a copy of your QC program.
- Send us a copy of your brochures and MSDS, including packaging and installation instructions.

No samples are required at this time.

Submit documentation to:
