		3724	PHRASEOLOGY MACHINERY OR EQUIPMENT ERECTION OR REPAIR NOC & DRIVERS.
2008	9.91%		<p>SCOPE Code 3724, a "not otherwise classified" code, is applied to contractors specializing in the erection or repair of heavy machinery or equipment at their customers' locations, which may include plants, factories and mills. This classification is also applied to contractors specializing in the installation or repair of electrical apparatus at their customers' locations. The term "electrical apparatus" means electrical power equipment such as, but not limited to, heavy motors, generators, converters, transformers, compressors and power switchboard equipment.</p> <p>Code 3724 is also applied to the installation of substation equipment in addition to central station equipment; however, it does not apply to the erection of poles, stringing of wires, installation of transformers on poles or on the outside of buildings or the making of service connections. While the operations vary depending upon the type of job, there is a considerable amount of heavy lifting, frequently by the use of hoists or cranes.</p> <p>The installation of overhead (garage) doors</p>

2007	14.07%	6252	SHAFT SINKING -- ALL OPERATIONS Includes pile driving, excavation, concrete work or lining. Caisson Work—All Operations to Completion—includes pile driving, excavation, masonry or concrete work. Applies to all employees working under air pressure and all others engaged in or upon the caisson or the apparatus connected therewith (N/A CO, MA); Cofferdam Dam Work—Not Pneumatic—All Operations to Completion—includes pile driving, excavation, and masonry or concrete work up to completion of the substructure only.  SCOPE Code 6252 is applied to specialist contractors engaged in all operations involving shaft sinking for bridge footings, piers or foundations. The operations involve the removal of earth from a hole with a relatively small diameter and usually from a considerable depth as compared with its diameter. To prevent cave-ins, wooden or steel sheeting may be driven into the shaft by hand or power apparatus. The classification contemplates these operations as well as any pile driving and concrete work connected herewith. Code 6252 also is applied to specialist contractors engaged in all operations involving pneumatic caisson work for bridge or pier foundations.

2006	11.18%	6325	TELEPHONE OR CABLE TV LINE INSTALLATION
2007	11.43%		Telephone or Cable TV Line Installation—Underground & Drivers—applies to the installation and maintenance of underground telephone and cable television main lines, extension lines and outside service connection lines, when done by a contractor. The installation or replacement of cable only in existing conduit by a specialty contractor shall be separately rated as 5190.
2008	10.71%		
2009	12.51%		
2010	11.28%		
2011	8.72%		
2012	9.12%		SCOPE Code 6325 is an all-inclusive classification and is intended to apply to an entire job, i.e., the erection of railway signal systems and/or highway guard-crossing systems. Operations such as the digging of a trench, laying of conduit, backfilling and concrete or masonry work are examples of the work contemplated by Code 6325. The same procedure is applicable to the installation of traffic signals, "auto-stops" and ornamental street lights. Cable laying by specialist contractors employing automatic equipment, which in one operation opens the trench, lays the cable and backfills, is also assigned to Code 6325.
