

Standard Guidelines for Product Review

## **Coating for Rebar, Epoxy;**

### **Section 02510.11**

July, 2013

### **02510.11 – Epoxy Coating for Rebar**

ODOT maintains a list of products suitable for placement on rebar to resist corrosion. These are factory applied products, and not suitable for field applications.

Specifications: ASTM A 775

To apply for inclusion on the QPL, submit the following:

- Preliminary information for Product Evaluation Form.
- Independent test results showing compliance with ASTM A 775.
- Current, legible copy of the MSDS.
- Copy of your Quality Control program.
- Spec data sheet.
- Name of approved patching material.
- List of limitations and precautions.

Submit documentation to:

Oregon Department of Transportation  
Product Evaluation Coordinator  
800 Airport Rd SE  
Salem OR 97301-4798

**Please send no samples at this time.**
