

Standard Guidelines for Product Review

Revetment;
Section 00390

August 26, 2002

00390 – Revetment

ODOT allows manufactured revetment products as showed on the plans and specifications. The anticipated use of revetment include bank protection, channel bottom protection, bridge abutment protection, scour protection, pipe outfall protection and other areas where protection from severe erosive forces caused by water is desired.

To apply for inclusion on the QPL, submit the following:

- Preliminary information for Product Evaluation Form
- Legible copy of the current MSDS
- Copies of Independent Test Data that demonstrates conformance with the above specifications
- Spec data sheet, including shop drawings
- Detailed installation instructions
- List of limitations and precautions

Submit documentation to:

Oregon DOT
Mike Dunning
800 Airport Road SE
Salem OR 97301-4798

Please send no samples at this time.
