

**RAILROAD**

STATE OF OREGON  
ROAD DESIGN SECTION

INTEROFFICE MEMO  
DES 9-1

TO: DESIGN TEAM LEADERS  
DESIGNERS

FROM: *Richard Kuehn*  
Rick Kuehn  
Final Design Engineer

SUBJECT: Railroad Crossings  
Surfacing Details

DATE: July 30, 1985

The surfacing details for Railroad Crossings will be as directed by the owner/operator of the line involved. This work will normally be done by others.

When a project is assigned to a designer, it should be determined early on if a railroad crossing is involved. In addition to the procedure involved with the PUC and Encroachment Map requirements, the designer shall contact the Railroad and Utility Engineer to determine the surfacing detail requirements.

Once the surfacing details are known, Specifications Unit shall be alerted so appropriate provision can be made.
