Bob Thompson  
ODOT Bridge Section  
355 Capitol Street NE, Room 301  
Salem, Oregon 97301

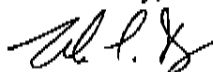

Dear Mr. Thompson:

This letter is a request to reconsider the ranking for the Bridge Street project located in the city of Sheridan in Yamhill County. Currently, this project is ranked 107 on the OTIA III Preliminary Short List for bridge improvements. The Mid-Willamette Valley Area Commission on Transportation (MWACT) is requesting reconsideration for this project because this bridge is critical to the community of Sheridan. The Yamhill River divides Sheridan, and this bridge provides the only link between the north and south portions of the community. It is important for not only vehicular traffic, including emergency service personnel, but also serves as the only pedestrian river crossing within the community.

The bridge is extremely vital to the local economy as it connects Sheridan to Highway 18 on the south and Highway 18 Business on the north. In addition, this bridge provides an important connection to developing industrial land within the community. Creation of local employment opportunities is critical for the economic health of small communities such as Sheridan.

For these reasons, MWACT requests reconsideration of this important project.

Sincerely,

 (Mark Fancy)

Val Adamson  
MWACT Chair

RE: Bridge No. 11540A – Baker Creek Road

Dear Mr. Thompson:

The City of McMinnville would like you to consider funding the Baker Creek Road Bridge located at the northwest edge of the city limits of McMinnville. This bridge is important to the agricultural and forest products industry of this area. It really is the only viable alternative to serve this area with commercial vehicles.

This bridge also provides quick and easy access to the northwest county area which is served by the City of McMinnville Rural Fire District. Load limits on this structure will lengthen the response time to this area considerably.

We urge your support of this project to retain the commerce and address safety concerns that will occur as this structure deteriorates.

If you have any questions, please contact me at (503) 434-7312.

Sincerely,

Donald E. Schut  
Community Development Department Director

RE: Bridge No. 11640A – West Side Road

Dear Mr. Thompson:

The City of McMinnville would like you to consider funding the West Side Road Bridge located at the north edge of the city limits of McMinnville. This bridge is important to the agricultural and forest products industry of this area. In addition, it serves as the route for many of the waste haulers coming to River Bend Landfill from the Washington County area.

This bridge and road section provides quick and easy access to the northwest county, which is served by the City of McMinnville Rural Fire District. Load limits on this structure will lengthen the response time to this area considerably.

We urge your support of this project to retain the commerce and address safety concerns that will occur as this structure deteriorates.

If you have any questions, please contact me at (503) 434-7312.

Sincerely,

A handwritten signature in black ink, appearing to read "Donald E. Schut".

Re: Bridge #11540A

Attached please find the summary sheet of contacts that we have made concerning the usage of this bridge. These contacts have all been made since November 24, 2003 and are representative of the current usage of the companies contacted. This list can not be considered all inclusive but rather a sample of the users that the county was able to contact since November 24<sup>th</sup>. Significant usage by out of area haulers and others not polled by the county's contact efforts would be difficult to quantify. These trips should be viewed as a partial representation of the type and volume of haulers using this bridge.

Thank you for the opportunity to provide additional information on this bridge application.

Sincerely,

A handwritten signature in cursive script that reads 'William A. Gille'.

## MEMORANDUM

---

**To:** Jay Lilly, Fire Chief

**From:** Scott Magers, Assistant Chief

**Date:** December 9, 2003

**Re:** Baker Creek Road Bridge

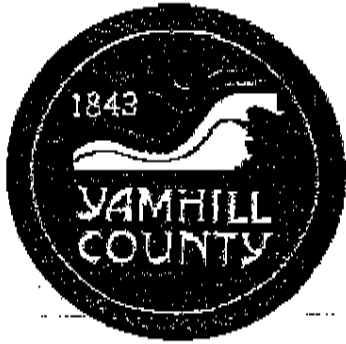

After reading the E-mail you sent me from Bill Gille regarding the bridge on Baker Creek Road I have some concerns. As I read the map the bridge in question, bridge # 11540A, is the bridge just west of the intersection of Hill Road North and Baker Creek Road.

The failure of this bridge would create a significant response problem for us in servicing the Northwest portion of our fire district. Loosing this bridge in essences cut us off from Willis Rd, Berry Creek Rd, Orchard view, Pheasant Hill, High Heaven and the rest of Baker Creek Road which includes sub-divisions like Hidden Hills. I cannot state the number of residents or population in this area, but feel comfortable in stating that it is one of our most populated rural areas. The inability to cross this bridge would force us to go around to Fir Crest Road to the north or Powerhouse Hill to the south to gain access to this area. This would add at least 20 -30 minutes to our response time. In the event of a structure fire or medical emergency 20-30 minutes is to late. To this end, this bridge is invaluable to our ability to provide service to these residents.

Additionally, not just this bridge but all of the bridges within our response area should be maintained to a standard that would allow for safe access to fire apparatus. Our heaviest fire apparatus that would respond into the rural area weighs 20 tons. Bridges must be maintained to handle the weight of these vehicles. I am not sure what the county standard is, but I would recommend that it be at least 20 tons. Also, bridges should be labeled with this information so we know what the limits are.

The failure of any bridge would have a significant impact on our response and ability to service an area. The bridge in question #11540A is at such a location that its failure would inhibit or increase our ability to respond to a very large area of our fire district. I would actively support this bridge being placed high on the list of repairs or maintenance.
