I-5: Elkhead Road – US126: Knowles Creek, Design-Build Bundle 508.

Main work: Bridge replacement and repair. This OTIA III design-build project involves replacement or repairs to seven (7) bridges on I-5 and Hwy 126. Specifically replacing two (2) bridges and partially replacing / repairing one (1) bridge on Interstate 5, and replacing three (3) bridges and repairing one (1) bridge on State Highway 126 in western Oregon.

This project will contain several interesting and challenging elements including detour bridge construction, staged construction, traffic control, roadway and approach construction, possible rapid construction, and numerous design and construction management elements.

The estimated contract value range is between \$45 and \$50 million. The Request for Qualifications (RFQ) is scheduled for release in early March 2008. The Request for Proposals (RFP) is scheduled for release to the short-listed teams in mid-May, 2008. Contract award is expected in December 2008 with construction anticipated to begin in early 2009 and to be completed by late 2011. Project information is available at the ODOT Major Projects Branch Website: <http://www.oregon.gov/ODOT/HWY/MPB.shtml>
