## WHAT'S NEW

### Reference Information Released – Bundle 414 Design-Build Project Procurement

June 5, 2007

Oregon Bridge Delivery Partners has released early reference information for Bundle 414 (US395: McKay Creek to Silvies Slough Design-Build project). The reference material is to provide interested parties with background technical information. The scope of Bundle 414 consists of 7 bridge replacements and 1 bridge repair on US395, US26, OR78 and OR19 in eastern Oregon. The estimated contract value is between \$25 and \$35 million. For more information see [Upcoming Design-Build Bundles in Procurement / Bundles](#) within Partner Central.

### Updated Monthly Report and Dashboards

May 31, 2007

The OTIA III State Bridge Delivery Program [Monthly Progress Report](#) for May, 2007 has been published. The [Program Dashboard](#) and [Projects Dashboard](#) have been updated with new status information from the report.

### 2007 Construction Season Update

May 25, 2007

Lights, camera... construction! ODOT Director Matt Garrett announces the kick-off of one of the busiest construction seasons in the Oregon's history, due in large part to work on the OTIA III State Bridge Delivery Program, with a webcast shot at the Marietta Street Bridge in Bundle 212. [See the ODOT Video Podcasts page for more information.](#)

### Environmental Specification Templates

February 13, 2007

New special provision templates for environmental requirements to assist in development of the Pre-Construction Assessment (PCA) and the construction special provisions have been published. Oregon Bridge Delivery Partners recommends these templates be used on all design projects. The templates can be found in [Environmental](#) within Partner Central.
