

# Rock Creek Bridges

The two Rock Creek bridges on U.S. 26 will be replaced with one bridge. During construction, there will be short-term impacts to the Rock Creek Trail. All trail closures will include prior notification and a signed detour for those on bikes and walking.

The creek bed and embankment of Rock Creek will be rebuilt.

The construction crew will use accelerated bridge construction to minimize the impact to the Rock Creek Trail and U.S. 26.
