

Decision Process: CRC Project, Hayden Island Plan, and the IAMP

**All future dates are approximate.*

What happens if the interchange design changes?

- There will be some changes to ramp locations, private property impacts, and local streets
- Where the ramps move farther from a property, it may become safer to allow more turn movements from the driveway
- Where the ramps move closer to a property, turn movements from the driveway may be limited for safety reasons, or the driveway may be moved
- ODOT will work with CRC staff, City staff, and Hayden Island residents and businesses to create safe access that is as convenient as possible
- The overall schedule will not change
