

TRAFFIC ADVISORY

Construction impacting traffic to halt for Independence Day

ODOT encourages motorists to practice safe driving during busy summer

During the Fourth of July holiday, the Oregon Department of Transportation will suspend work that impacts traffic. **All such work will be halted between noon on Tuesday, July 3, and midnight on Wednesday night, July 4.**

Safe Driving

ODOT encourages motorists, during the busy summer traveling season and beyond, to practice safe driving — and conserve fuel at the same time.

Studies show the faster you drive, the more fuel you use: and speed is the number one factor in crash fatalities in Oregon. So "slow down" is the phrase everyone is using.

"With the Fourth of July falling on a Wednesday this year, we're anticipating heavy traffic on the weekends before and after the holiday, as well as during the week," said Troy Costales, ODOT Safety Division administrator. "We thought this would be a great chance to remind people that driving within posted speed limits helps save fuel as well as lives."

Fuel Conservation

The U.S. Department of Energy offers consumers several tips for conserving fuel:

- ◆ Stay within posted speed limits. For example, driving 65 mph rather than 55 mph increases fuel consumption by 15 - 20 percent.
- ◆ Remove excess weight. An extra 100 pounds in your vehicle could reduce your mpg by up to 2 percent.

—more—

- ◆ Drive sensibly — don't tailgate. If you practice safe driving, you can avoid unnecessary braking and acceleration, improving your fuel economy by 5 – 10 percent.
- ◆ Combine errands. Several short trips from a cold start can use twice as much fuel as one trip covering the same distance when the engine is warm. Visit the "Drive Less. Save More." Web site for more information, www.driveless.savemore.com
