

## TRAFFIC ADVISORY

### Lane closures on lower deck of Marquam Bridge

***Nighttime bracket replacement project is scheduled to close lanes from Oct. 12-Nov. 13***

Oregon Department of Transportation bridge crews plan to begin a one-month project on Sunday night, Oct. 12, to install replacement support brackets on the Marquam Bridge. **The work will require two-lane closures on the lower deck (southbound direction) of the Marquam Bridge during work hours. All ramps will remain open during this project.** The work is planned to take place as follows, with crews working on the left side of the bridge first, then moving to the right side (the schedule may change depending on progress made each night):

- ◆ **The left two lanes of the Marquam Bridge south (lower deck) will be closed nightly from Sunday, Oct. 12, through Monday, Oct. 27.** The closures will take place between 9 p.m. and 5 a.m. nightly. The lane closures end prior to the ramp to Interstate 405 north, which will remain open during the work. The right two lanes of the Marquam Bridge south also will be open at all times.
- ◆ **The right two lanes of the Marquam Bridge south (lower deck) will be closed nightly from Tuesday, Oct. 28, through Thursday, Nov. 13.** The lane closures will take place between 9 p.m. and 5 a.m. nightly. The lane closures end prior to the ramp connecting the bridge to I-5 south. That ramp and the left two lanes of the bridge will remain open at all times.

Please watch for equipment and truck traffic in the work zone.
