## **US30: Widening at Van Street**

**Key Number:** TBD

**Project Name:** US30: Widening at Van Street

**Project Location:** Clatskanie

**Contact Person:** Tim Wilson

Phone: 503.731.8534

**Total Estimated Project Cost:** \$ 1,700,000

**Project Description:** Construct a left turn lane for eastbound traffic on US30 to Van Street. This would result in the widening of the Clatskanie River Bridge. This bridge is scheduled for OTIA III work. The existing bridge creates a constraint to the widening of US30. The [two-lane](#) bridge, constructed in the mid 1950's, doesn't meet current seismic design standards and has sub-standard shoulders. The replacement of the bridge would allow for continuity in the continuous two way left turn ([CTWLT](#)) lane by connecting the left turn lane for Van Street with the CTWLT proposed to the west. This project cost would add funding to the OTIA III bridge cost to widen the bridge for the left turn lane on US 30.
