TV HIGHWAY PAVING PROJECT

Minter Bridge Road to 331st Avenue

March 2013

Project Information

ODOT, in partnership with the City of Hillsboro, will begin construction in April 2013 on a \$14 million paving and utility project on TV Highway (OR 8) from Minter Bridge Road to SW 331st Avenue. This stretch includes 10th Avenue, Baseline Street and Oak Street through downtown Hillsboro. Work includes:

- Grinding, reconstructing, paving and restriping TV Highway from Minter Bridge Road to SW 331st Avenue
- Significantly upgrading the City's water and stormwater systems. Portions of the City's water and storm pipes will be entirely replaced in downtown Hillsboro
- Improving more than 100 ADA ramps (accessible curb ramps)
- Repairing the Dairy Creek Bridge
- Improving signage

TV Highway in this section is in poor condition and in need of repair and reconstruction. In addition, the City of Hillsboro is including major utility upgrades on TV Highway as part of the project. The City's water mains buried under Oak Street and Baseline Street are at least 60 years old and predominately steel pipe. The joints between the steel pipes are aging and causing leaks. Approximately two miles of new waterlines will be installed on this project as part of the annual pipeline replacement program. The new mains and meters will ensure quality water service to hundreds of commercial, industrial and residential customers along TV Highway.

By making all the improvements in one cohesive project, ODOT and the City of Hillsboro will save tax dollars and increase efficiency.

**Join us for a
Public
Open House:
April 3, 2013
Details
inside**

Major road construction on TV Highway in Hillsboro beginning April 2013. Details inside.

Stay current with the project:

- Visit the project website at **www.tvhwypaving.org**. The project website will have current information, including detailed traffic impacts in a weekly construction update posted every Friday.
- Visit **www.tripcheck.com** or call 511 for current traffic conditions and impacts
- Call the noise hotline (24-hour number to be used for noise concerns): 503-412-2356.

FOR MORE INFORMATION, to be added to the project email list, or to request a meeting, please contact:

Open House on April 3!

Please join ODOT and City of Hillsboro project staff for a Public Open House on April 3, 2013.

The public is invited to stop in at any time during the open house. Project team members will be on hand to discuss project details, including traffic impacts and construction schedule and answer questions.

WHAT: Public Open House.
Everyone is welcome.

WHEN: Wednesday, April 3, 2013
5 - 7 pm. Stop by anytime.

WHERE: Hillsboro Civic Center, Room 113 B&C
150 E Main Street, Hillsboro

Accommodations will be provided to persons with disabilities. If a sign language interpreter is needed, please call (503) 731-8247 or TTY (800) 735-2900 at least 48 hours prior to the open house.

**Public
Open House
April 3,
2013**

Nuestro evento para el público en general del 3 de abril contará con un intérprete en español. Si tiene preguntas sobre el proyecto, visite por favor www.tvhwypaving.org o llame al 503-731-4128.

Traffic impacts and schedule

Road users on TV Highway will encounter significant construction during the day and night from 2013 to 2015. There will be delays and detours in place throughout construction, especially in downtown Hillsboro.

The following traffic impacts are planned:

- Single-lane closures may occur on TV Highway during the day or night, 7 days a week
- Double-lane closures may occur on Oak and Baseline streets between 10th Avenue and Dennis Avenue from 7 pm to 6 am weekdays, until 9 am Saturdays and until 10 am Sundays.
- There will be intersection closures along Oak and Baseline streets, during a limited number of weekends.

Construction signage will direct people through any detours. Access to the main entrance and emergency room of Tuality Hospital will remain open at all times. TriMet service on TV Highway will be intermittently affected during lane and

intersection closures. Any TriMet detours will be communicated on www.trimet.org and at the bus stops. There will be intermittent on-street parking restrictions on Oak and Baseline Streets throughout construction.

During double-lane and intersection closures, large trucks will be detoured from Baseline Street to Walnut Street. On-street parking on Walnut Street may be limited in some sections to allow for wider trucks. To minimize truck noise on Walnut Street, flaggers will be used to move trucks through intersections without stopping.

This will be a disruptive project on TV Highway. Considerable effort is being made to maintain business and resident access and minimize traffic impacts. There will be unavoidable temporary access closures, which will be communicated individually to businesses and residents during construction. Thank you in advance for your patience and please travel slowly and carefully through the construction.

Nighttime noise

Due to high traffic volumes on TV Highway, most of the lane closures and construction activity will occur at night. The contractor will be required to turn off truck backup alarms during nighttime work after 10 pm. Flaggers will be used to move trucks through sensitive intersections without stopping, which will

help reduce noise. A 24-hour noise hotline is available to be called at all hours should a noise concern arise. That number is 503-412-2356. ODOT staff will be available to answer immediate noise concerns during nighttime work by calling the noise hotline.
