PROJECT PURPOSE

Aging equipment (circa 1971) becoming more difficult & expensive to maintain and operate. Parts for repairs are hard to find and require out of state purchase at salvage lots. Continuous system failures require higher than normal maintenance activity with harder to find replacement parts. Electrical upgrades and maintenance are required for both Astoria and Seaside signal locations.

Replace signal conduits at the following locations:

14th/Marine Dr.(2 poles);14th/Commercial St. (1 pole);12th/Commercial St. (1 pole);11th/Marine Dr. (2 poles);11th/Commercial St. (1 pole);9th/Marine Dr. (2 poles);9th/Commercial St. (1 pole);8th/Commercial St. (1 pole);11th/Duane (2 poles);Portway/Marine Dr. (2 poles).

All poles are within City of Astoria.

Upgrade electrical work including; new junction boxes, wireless interconnect, and pre-emption devices for both Astoria and Seaside Fire Departments.
