### **PROJECT PURPOSE AND NEED**

The existing bridge was built in 1966. Construction consisted of steel deck girders (1842 tons) & steel thru deck trusses (7,559 tons). The bridge is subjected to high winds and a harsh marine environment. As a result, there is widespread rusting and deterioration of the steel members.

### **CONSTRUCTION OVERVIEW**

The project will clean and paint the existing steel deck girders and steel thru trusses. The project cost will be shared by Oregon and Washington states.
