PROJECT PURPOSE AND NEED

The purpose of this preservation/safety project is to provide an asphalt overlay onto the existing road surface and add 4 vehicle pull-out locations. Nearly 10 miles will be paved as part of this project.

The safety pull out locations will be constructed between Beaver and Hebo, 2 northbound and 2 south bound.

Bridge approaches, up to 200 feet, will be rebuilt at Prairie Creek(MP 68.45), Anderson Creek (MP68.67), and Fawcett Creek (MP 71.18).

Complete rebuild of subgrade between MP 73 and 75.

Sections of single lane restrictions may be encountered during construction. Night time paving may be used to reduce impacts to summer travel.
