

Highway Project Information

Area 1 Project Office: Astoria (503) 325-7222

State Highway Development and Construction in Clatsop and Tillamook Counties

US101: Old Condor Road - Hebo

PROJECT SPECIFICS

- ✓ **Location :**
US101 between M.P. 83.70 and 84.67
- ✓ **Key milestones:**
Bid Let Date – 4-09-10
Construction – All year
- ✓ **Cost Estimate :**
\$6,570,000

KEY CONTACT PERSON

Michael Schroeder (503) 325-7222

PROJECT PURPOSE AND NEED

Slow moving vehicles cause severe congestion during Peak times. This section of US101 has two travel lanes and winds through numerous sharp horizontal and vertical curves. The terrain is steep. Horizontal sight distance is very limited in curve sections and vertical sight distance is limited in the tangent sections. These combined problems present very few sections long enough to provide safe passing opportunities. The highway is built on a combination of steep cuts and fills and much of it is flanked by the Nestucca River between Hebo and Cloverdale.

CONSTRUCTION OVERVIEW

Provide standard north and south bound passing lanes between M.P. 83.70 and M.P. 84.67. This section offers the only reasonable opportunity to widen the existing highway over a long enough distance to create safe passing lanes. The section crosses the Nestucca River and would require widening of the existing structure by 36'. The roadway will be widened to four lanes. Widening will be equal on both side of US101.
