

# OR 138E Corridor Solutions (Roseburg) Project Overview

- Paving limits
- Bridge
- Realigned roads

- New traffic signal
- Railroad crossing upgrade
- New sidewalk
- Existing multiuse path
- New multiuse path

**PROJECT-WIDE FEATURES:** New streetlights, sidewalks, bike lanes and traffic signs will be installed in several locations. The entire project area will be resurfaced with new asphalt and striping.

**DEER CREEK BRIDGE:** The deck and other parts of the bridge will be repaired.

**STEPHENS AT DIAMOND LAKE:** A refuge and new crosswalks will be installed for pedestrians crossing Diamond Lake Boulevard.

**WASHINGTON AVENUE BRIDGE:** Bridge work includes deck repairs, a pavement overlay, wider bicycle lanes and new streetlights.

**OAK AVENUE BRIDGE:** Project will repair and resurface deck, and install a 10-foot wide multiuse path, two new riverview outlooks, new pedestrian rail and streetlights.

**SPRUCE STREET REALIGNMENT:** The north leg of Spruce Street will be realigned so that motorists can safely cross Oak Avenue.

**PINE STREET REALIGNMENT:** A two block section of Pine Street will be realigned. On Washington Avenue, Pine and Stephens will merged into a single intersection.

= NEW TURN LANES
