TOPIC <i>Memo to Designers</i>	NUMBER <i>TR05-10(A)</i>	SUPERSEDES <i>Formerly Numbered TA 05-04</i>
APPROVAL <i>Original signed by Edward L. Fischer, P.E., PTOE</i>	EFFECTIVE DATE <i>06/17/2005</i>	VALIDATION DATE <i>08/01/2006</i>

Topic

Junction Box Spacing

Advisory Information (use additional pages if needed)

(This document replaces the Memo to Designers, used to alert Traffic Designers of approved changes.)

Previous maximum spacing of traffic signal junction boxes was 190 feet. Statewide concurrence at last year’s Electrical and Maintenance meeting allows for the maximum spacing to be 300 feet. This has been updated in the special provisions.
