

Teddie Baker is a freight mobility planner specializing in air cargo, intermodal connectors, and pipeline transportation. Teddie assisted in the development of the ConnectOregon program from initiation of the first administrative rule, application design and process, staffing of review committees through completion of the project selection phase and will serve as administrator of ConnectOregon II aviation projects.

She has more than 25 years of experience in the aviation industry administering federal and state grants, managing capital construction projects, and helping local municipalities obtain project funding. Teddie previously worked for the Oregon Department of Aviation, Rogue Valley International-Medford Airport and Lockheed Corporation and is a graduate of the Oregon Project Management Certification Program.
