

# West Coast Ports Tonnage

- **23 million tons** moved through Portland Harbor

21,000,000

- **22 million tons** moved through other lower Columbia River ports (international only)

23,000,000

22,000,000

- **\$13 billion** value of tonnage trade in Portland Harbor

23,000,000

19,000,000

58,000,000

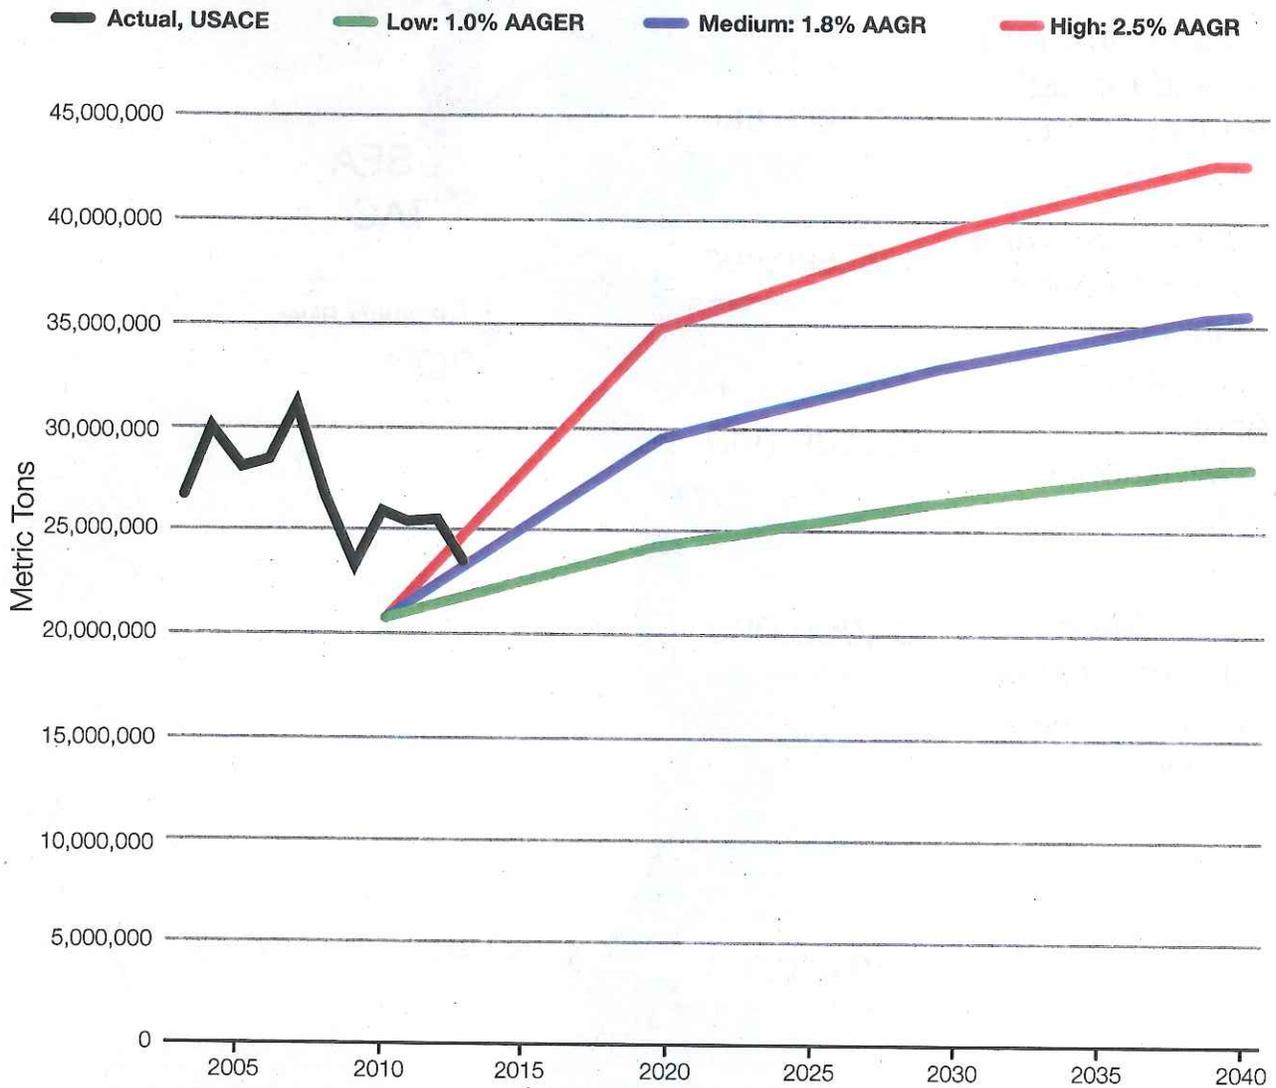

84,000,000

The Portland Harbor tonnage includes both public and private terminals. The Port of Portland terminals represent about half of the total. The loss of container service that occurred in 2015 would reduce the overall tonnage by about 1.8 million tons.

2013 total tonnage

# Portland Marine Terminal Cargo Forecast

Source: Actual tonnage data (2003-2013) is from USACE Waterborne Commerce of the US. Forecast scenarios were developed by BST Associates (Portland and Vancouver Harbor Forecast Update, 2012) and used as a basis of forecast marine land needs by ECONW (Portland Harbor Industrial Land Supply, May 2012, in Portland EOA Section 1, Appendix C).
