

Table of Contents

5 Assessing Performance

5.1 Purpose	5-1
5.2 Crash Analysis	5-2
5.2.1 Calculating Crash Rates	5-2
5.2.2 Identifying Crash Patterns	5-5
5.2.3 What Data to Report	5-6
5.2.4 Countermeasure Selection	5-6
5.3 Peak Hour Factors	5-7
5.3.1 Calculation	5-7
5.3.2 Existing Conditions	5-7
5.3.3 Future Conditions	5-9
5.3.4 Special Cases	5-9
5.4 Access Management	5-11
5.4.1 Impacts of Access Management Implementation	5-11
5.4.2 ODOT Access Management Policies: 1999 Oregon Highway Plan	5-11
5.4.3 OAR 734-051: Highway Approaches, Access Control, Spacing Standards and Medians	5-12
5.4.4 Evaluation of Existing Access Conditions	5-12
5.5 Sight Distance	5-14
5.6 To Be Added	5-15
5.7 Other Analysis Issues/Procedures	5-16

6 Segment Analysis

6.1 Purpose	6-1
6.2 Freeways	6-2
6.2.1 Basic Freeway Segments	6-2
6.2.2 Ramps and Ramp Junctions	6-2
6.2.3 Weaving Segments	6-5
6.3 Multi-Lane Highways	6-14
6.4 Two-Lane Highways	6-15
6.4.1 Two-Way vs. Directional Analysis	6-15
6.4.2 Performance Measures	6-15
6.4.3 Passing and Climbing Lanes	6-16
6.4.4 Other Analysis Procedures	6-17

7 Intersection Analysis

7.1 Purpose	7-1
7.2 Turn Lane Criteria	7-2
7.2.1 Left Turn Lane Criteria	7-2

7.2.2 Right Turn Lane Criteria – Unsignalized Intersections	7-6
7.2.3 Criteria for Turn Lanes at Signalized Intersections	7-9
7.3 Intersection Capacity Analysis	7-10
7.3.1 Intersection Functional Area	7-10
7.3.2 Effects of Upstream or Downstream Bottlenecks	7-11
7.3.3 Peak Demand Exceeds Operational Capacity	7-12
7.3.4 Actual Versus Theoretical Conditions	7-12
7.3.5 Unsignalized Intersection Capacity	7-12
7.3.6 Roundabouts	7-14
7.3.7 Signalized Intersection Analysis	7-38
7.3.8 Software and Tools Available for Analysis	7-53
7.3.9 Synchro Settings	7-57
7.4 Traffic Signal Warrants.....	7-72
7.4.1 Preliminary Signal Warrants	7-73
7.4.2 Manual of Uniform Traffic Control Devices Signal Warrants	7-85
7.5 Estimating Vehicle Queue Lengths	7-87
7.5.1 Methodologies for Signalized Movements	7-87
7.5.2 Methodologies for Unsignalized Movements	7-91

8 Traffic Simulation Models

8.1 Purpose	8-1
8.2 Traffic Simulation Modeling	8-2
8.3 SimTraffic	8-5
8.3.1 Simulation Calibration.....	8-5
8.3.2 Simulation Preparation	8-6
8.3.3 Simulation Settings Window	8-7
8.3.4 SimTraffic Parameter File.....	8-10
8.3.5 Simulation Execution	8-15
8.3.6 Simulation Outputs	8-16
8.4 VISSIM	8-23
8.5 Paramics	8-25
8.6 CORSIM	8-27

9 Determining Needs

9.1 Purpose	9-1
9.2 Standards for Determining Needs	9-2
9.3 Applicable Oregon Highway Standards	9-4
9.3.1 Mobility	9-4
9.3.2 Safety	9-5
9.4 Analysis of Transportation System	9-6
9.4.1 Existing System	9-6
9.4.2 Future No-Build System	9-6
9.4.3 Travel Demand Management Options	9-7

10 Analyzing Alternatives

10.1 Purpose	10-1
10.2 Highway Design Manual Standards	10-2
10.3 Screening Preliminary Alternatives	10-3
10.3.1 Coordination with Stakeholders	10-3
10.3.2 Potential Facility Solutions	10-4
10.4 Identifying Limitations to Design Concepts	10-15
10.5 Documentation of Screening Process	10-17
10.5.1 Evaluation Criteria	10-17
10.5.2 Alternatives No Longer Considered	10-17
10.6 Evaluating Build Alternatives	10-18
10.6.1 Analysis of Future Conditions	10-18
10.6.2 Progression Analysis	10-22

11 Air and Noise Traffic Data

11.1 Purpose	11-1
11.2 Input for Noise Analysis	11-2
11.2.1 Common Data Needs	11-4
11.2.2 Calculations	11-6
11.2.3 Process	11-16
11.3 Input for Air Quality Analysis	11-17
11.4 EISBase	11-18
11.4.1 Output and Final Product	11-19

12 Traffic Analysis Reports

12.1 Purpose	12-1
12.2 Background	12-2
12.2.1 Technical Writing Tips	12-2
12.2.2 Diagrams and Illustrations	12-3
12.3 Technical Memorandum	12-5
12.3.1 Purpose	12-5
12.3.2 Products	12-5
12.3.3 Distribution	12-6
12.4 Traffic Narrative Report	12-7
12.4.1 Purpose	12-7
12.4.2 Product	12-7
12.4.3 Distribution	12-10

Appendices

Appendix A	Resources
Appendix B	Glossary
Appendix C	ODOT Traffic Engineering Authority
Appendix D	Sample ODOT Count Request, 16-Hour Intersection Count and Road Tube Count
Appendix E	Procedure for Analysis and Design of Weaving Sections, A User's Guide (Jack E. Leisch & Associates)
Appendix F	Sample Narratives
Appendix G	Example Tech Memos
Appendix H	Forms

List of Tables

Table 5-1	Equations for Crash Rate Calculations	5-2
Table 5-2	Common Crash Types and Potential Causes/Countermeasures	5-5
Table 6-1	Level of Service Criteria for Weaving Segments	6-10
Table 6-2	Multiplied Flow Rates	6-13
Table 7-1	Intersection Performance Assessment by Critical Volume	7-53
Table 7-2	Parking Coding.....	7-60
Table 7-3	Recommended Yellow, All-Red & Lost Time Adjustment Values.	7-63
Table 7-4	Critical Gaps for Four-Leg Three-Approach Intersections.....	7-64
Table 7-5	ODOT Phasing Settings Defaults.....	7-65
Table 7-6	Synchro-Adjusted ODOT Detector Type and Position	7-68
Table 7-7	Selection of “t” Values	7-89
Table 7-8	Storage Length Adjustments for Trucks	7-90
Table 8-1	Headway Factors	8-9
Table 8-2	ODOT Green React Times.....	8-13
Table 9-1	Sources of Performance Measures by Project Type	9-3
Table 9-2	Types of Performance Measures Applications	9-4
