**Mission:** *Focus efforts to develop an efficient, safe transportation system that enhances Oregon's economic competitiveness and livability.*

The Transportation Development Division plans and develops Oregon's transportation future. It focuses on providing Oregonians with a balanced, well-connected system. The Division's programs develop Oregon's future transportation systems with plans that vary in length up to 20 years. The Division researches, collects and analyzes information for decision-makers.

The Division is comprised of five sections: Administrative Support Services, Asset Management Integration, Freight Mobility, Planning and Transportation Data.

Fiscal and budget information	Karen Guzman	(503) 986-4073
Public information, communications, news media relations	Shelley Snow	(503) 986-3438

### ADMINISTRATIVE SUPPORT SERVICES SECTION

Manager                                      Connie Sparks                                      (503) 986-4204

The Section provides contact support to the other sections in TDD. Responsibilities include clerical and support duties, vendor payments, and division personnel and payroll administration, as well as building operations coordination, security, safety and maintenance activities for the Mill Creek Building. The Section provides Transportation Program Development (TPD) budgeting and financial reporting.

Asset Management Integration Home Page: [http://www.oregon.gov/ODOT/TD/asset\\_mgmt/](http://www.oregon.gov/ODOT/TD/asset_mgmt/)

**Mission:** *Provide organizational leadership in the development and maintenance of: data collection and storage systems that contain corporate data for transportation features including but not limited to location, type, size and condition; analysis and reporting systems that perform cross-asset analysis and that monitor the inventory, condition, performance and value of assets; decision processes that focus on the life-cycle management of ODOT assets so that funding allocation decisions are broad-based across various asset categories.*

The Asset Management Integration Section's primary focus is tied to goals contained in ODOT's Asset Management Implementation Plan approved in April of 2006.

- A robust Asset Management Data Collection and Storage System that contains corporate data for transportation features and their condition that is consistent, unduplicated, understandable, reliable, accurate, current and owned by the responsible ODOT Business Line.
- An automated, flexible and complete Asset Management Data Reporting System that performs cross-asset analysis and monitors the inventory, condition and performance of assets within ODOT's jurisdiction.
- A decision process that focuses on the life-cycle management of ODOT assets, so that funding allocation decisions are broad-based across various asset categories.

Asset Integration Coordinator	Laura Hansen	(503) 986-3308

Freight Home Page: <http://www.oregon.gov/odot/td/freight/>

The Freight Mobility Section provides a point of contact for freight stakeholders and for other interested parties. The Section provides support for the Freight Advisory Committee and freight planning expertise for ODOT and local planning efforts. This includes the development of a statewide Freight Strategic Plan that is currently under development.

The Section is also responsible for the implementation of ConnectOregon I and project selection for ConnectOregon II, both of which established a \$100 million dollar Multimodal Transportation Fund for air, marine, rail and public transit projects.

**Mission:** Provide direction for long term management and improvement of Oregon's transportation system and to promote the cost-effective use of public funds through effective research, development and technology transfer.

The Planning Section guides and supports short- and long-range planning for Oregon's transportation system. Staff manages land use and transportation planning, the transportation and land use model improvement program, the congestion monitoring system, transportation system analysis and transportation research. It also administers the State Planning and Research Program that directs activities funded by the Federal Highway Administration and the state.

### LONG RANGE PLANNING UNIT

Manager	Robert Maestre	(503) 986-4165
---------	----------------	----------------

The Long Range Planning Unit produces the Oregon Transportation Plan and the Oregon Highway Plan and coordinates with other long-range statewide planning efforts.

The Transportation and Growth Management Program is a joint effort of ODOT and the Department of Land Conservation and Development to integrate transportation and land use planning to create livable communities connected by an efficient transportation network that provides convenient options for travel and commerce. The program provides funding and planning guidance to local jurisdictions as they develop transportation system plans.

<b>PLANNING AND IMPLEMENTATION UNIT</b>		
Manager	Lisa Nell	(503) 986-4227

The Planning and Implementation Unit develops planning and implementation studies, analyzes planning policies and procedures, and provides guidance and training on implementing:

- The Oregon Transportation Plan;
- The Oregon Highway Plan;
- Corridor and transportation system planning efforts including program/methodology development; and
- The provision of information, oversight, coordination and review of plans developed in the Regions and local jurisdictions.

The unit also provides support for the Statewide Transportation Improvement Program (STIP) development with a focus on developing the selection criteria and prioritization factors. The unit provides assistance in interpretation and development of Oregon Administrative Rules and ODOT plans and policies such as the Transportation Planning Rule and State Agency Coordination Program.

SPR Program Manager/MPOs	Deborah Benavidez	(503) 986-4220
STIP Process	Rodney Stewart	(503) 986-6576

Land Use/Transportation Planning/Development Review	Nancy Murphy	(503) 986-4128

<b>TRANSPORTATION PLANNING ANALYSIS UNIT</b>		
Manager	Brian Dunn	(503) 986-4103

The Transportation Planning Analysis Unit (TPAU) provides support and evaluation of corridor and urban transportation system plans. Staff provides transportation model development guidance to region staff, metropolitan planning organizations and local jurisdictions. Staff uses computer models to forecast transportation needs and evaluates the impacts of transportation, economic and land use decisions. The unit develops the Congestion Monitoring System to help decision-makers find cost-effective ways to manage transportation facilities that alleviate traffic congestion. Staff members conduct transportation analysis to support project selection decisions for the Statewide Transportation Improvement Program. Traffic data is developed for environmental analysis and for design recommendations during project development. The unit conducts household, tourism, freight transport and other travel-related surveys and studies.

Urban Area Transportation Models	Sam Ayash	(503) 986-4101
Transportation Analysis Methods/Procedures	Doug Norval	(503) 986-4111

**Mission:** Provide leadership for informed transportation decisions through data collection, analysis, integration and dissemination.

The Transportation Data Section is responsible for monitoring transportation system performance through the National Highway System, Functional Classification, Crash Analysis, Highway Performance Monitoring System and Traffic Counting programs. The Section provides data management vision, leadership and coordination through the development of standards and training in the use of geospatial data and data integration for ODOT's Asset Management Systems.

### CRASH ANALYSIS AND REPORTING UNIT

Manager (Interim)	Robin Ness	(503) 986-4236
-------------------	------------	----------------

The Crash Analysis and Reporting (CAR) Unit provides motor vehicle crash data through database creation, maintenance and quality assurance, information and reports, and limited database access. A minimum of ten years of crash data is maintained at all times. The Fatality Analysis Reporting System (FARS) is a comprehensive file on fatal crashes in Oregon. The motor carrier file contains detailed information on truck related crashes.

Crash Casework	Sylvia Vogel	(503) 986-4240
Crash Data Reports	Sylvia Vogel	(503) 986-4240

### GEOGRAPHIC INFORMATION SERVICES UNIT

Manager	Dennis Scofield	(503) 986-3156
---------	-----------------	----------------

The Geographic Information Services (GIS) Unit is responsible for Geographic Information System products; preparation of Oregon Transportation Map Bases and Enlargement Area maps; Official State Highway Maps; and custom mapping and data products as requested. This includes the development and support of the Environmental Data Management System (EDMS).

GIS Products	Susan Mead	(503) 986-4252

**TRANSPORTATION SYSTEMS MONITORING UNIT**

Team Leader

Don Crownover

(503) 986-4132

The Transportation Systems Monitoring (TSM) Unit is responsible for the Traffic Monitoring Program, which provides vehicle class and traffic volumes for Federal, State, local and private decision makers. This effort supports project development (design and construction), operations, maintenance, planning, state and regional modeling, and the Highway Performance Monitoring System. Data is used both for specific locations (average daily traffic) as well as rolled up for summaries of geographic areas (vehicle miles of travel).

Traffic Monitoring	Tricia Tanner	(503) 986-4159
Traffic Counting Field Coordinator	Henry Salvatori	(503) 986-6602

**TRANSPORTATION DEVELOPMENT, TRANSIT & RAIL DIVISIONS' AUTOMATION UNIT**

Manager (Interim)

Robin Ness

(503) 986-4236

The TDD & Transit and Rail Automation Unit is responsible for computer hardware, software, general technology support and automation initiatives that affect these divisions.

Transportation planners and other staff located in the various Highway Regions are responsible for various programs including:

- Transportation System Plans (TSPs) for local governments
- Facility Plans
- Development Review
- Metropolitan Planning Organizations (MPOs)
- Area Commissions on Transportation (ACTs)
- Bridge Management Program
- Pavement Management Program
- Safety Management Program, and

**THE STATE TRANSPORTATION IMPROVEMENT PLAN (STIP)**

Federal regulations require ODOT to develop a transportation improvement program and to update it every two years. Projects are initially identified and prioritized based on transportation system planning, crash data, management systems and stakeholder input. Individuals with expertise in pavement, bridge, environmental, geohydro, planning and traffic engineering provide technical advice to further prioritize projects. The final step is to decide which projects to include in the STIP based on available revenue, cost-benefit information, local cost-sharing agreements, stakeholder input and other programming considerations.
