Mission: *Focus efforts to develop an efficient, safe transportation system that enhances Oregon's economic competitiveness and livability.*

The Transportation Development Division plans and develops Oregon's transportation future. It focuses on providing Oregonians with a balanced, well-connected system. The Division's programs develop Oregon's future multimodal transportation system with plans that vary in length up to 20 years. The Division researches, collects and analyzes information for decision-makers.

The Division is comprised of five sections: Administrative Support Services, Active Transportation, Research, Planning and Transportation Data.

Fiscal and budget information	Karen Guzman	(503) 986-4073
Public information, communications, news media relations	Shelley Snow	(503) 986-3438

ADMINISTRATIVE SUPPORT SERVICES SECTION

Manager Connie Sparks (503) 986-4204

The Section provides contact support to the other sections in TDD. Responsibilities include clerical and support duties, vendor payments, and division personnel and payroll administration, as well as building operations coordination, security, safety and maintenance activities for the Mill Creek Building. The Section provides Transportation Program Development (TPD) budgeting and financial reporting.

Mission: *Strategically integrate program and funding sources to promote multimodal and sustainable transportation solutions.*

The Active Transportation Section consists of two units:

- 1) The Program and Funding Services Unit
- 2) The Statewide Programs Unit

The Section seeks to continuously make ODOT Active Transportation programs more efficient and of greater impact to Oregon by combining and leveraging similar administrative processes, revenue streams, and program outcomes to support sustainable/integrated transportation solutions.

ECONOMIC AND FINANCIAL ANALYSIS UNIT

Manager	Dave Kavanaugh	(503) 986-5362
	FAX	(503) 986-4173

Economics & Financial Analysis provides a broad array of economic forecasts and financial analytic services throughout the Agency. These span highway revenue forecasting, long-run financial forecasts, highway cost responsibility studies (in conjunction with DAS – Office of Economic Analysis), and construction cost forecasting. In addition, the unit conducts regional economic impact analyses to assess the employment impacts of the Department’s various construction programs, as well as recurring support of our relationships with our inter-agency and local government stakeholders.

MISSION: To provide both the Agency and external entities with the highest quality economics products and services that embody the Agency’s overarching Vision and Mission statements.

PROGRAM AND FUNDING SERVICES UNIT

Manager	Steve Leep	(503) 986-4453
	FAX	(503) 986-4173

The Program and Funding Services Unit is responsible for the development of the Statewide Transportation Improvement Program (STIP), Project Funding, Financial Plan and Project Accounting.

STIP development includes providing information, leadership, oversight and guidance to ODOT regions for STIP development processes and activities, project selection and prioritization activities and STIP public involvement activities, while ensuring state and federal requirements for STIP development are met. Additionally, STIP amendments are managed.

Project Funding requires interaction with ODOT Regions and Divisions and other state agencies in establishing the correct funding for projects. This involves securing federal authorization for projects and special programs and creating billing and expenditure accounts for projects based on that funding.

The Financial Plan monitors the financial position of both state and local programs by capturing the current funding obligations and showing the planned future project positions.

Project Accounting includes analyzing and interpreting accounting records to ensure compliance with state and federal regulations and local/interagency agreements. Financial documents are prepared for both the Federal Highway Administration and Local Governments.

STATEWIDE PROGRAMS UNIT		
Manager	Darel Capps	(503) 986-3880
	FAX	(503) 986-3290

The Statewide Programs Unit provides statewide management and/or support for federal and state-funded non-highway/multi-modal transportation programs. Active Transportation managers coordinate and facilitate statewide project application processes, project evaluation and award, and other steps prior to transitioning approved projects to the regions and local agencies for project design and construction. The Unit coordinates project change management for Active Transportation programs and monitors program progress against milestones and performance targets.

The Unit is also home to ODOT's Local Government Certification Program, and maintains the Local Agency Guideline manual. It provides support to ODOT Regions in their delivery of the Local Government program by providing 2-tier consultant administration and other central administrative services.

ODOT's Sustainability program is also housed in this Unit, continuing its broad reach across ODOT and other state and local agencies to lead ODOT's efforts in providing sustainable transportation solutions and climate change adaptation.

Mission: *Provide direction for long term management and improvement of Oregon's transportation system and to promote the cost-effective use of public funds through effective research, development and technology transfer.*

The Planning Section guides and supports short- and long-range planning for Oregon's transportation system. Staff manages land use and transportation planning, the transportation and land use model improvement program, the congestion monitoring system, freight planning and transportation system analysis. It also administers the State Planning and Research Program that directs activities funded by the Federal Highway Administration and the state.

	Manager	Michael Bufalino	(503) 986-3208
--	---------	------------------	----------------

Freight Home Page: <http://www.oregon.gov/odot/td/freight/>

The Freight Planning Unit provides a point of contact for freight stakeholders and for other interested parties. The Unit provides support for the Freight Advisory Committee and freight planning expertise for ODOT and local planning efforts. This includes the implementation of the 2011 Oregon Freight Plan.

The Unit is also responsible for the project selection for the *ConnectOregon* program, which allocates funds from the Multimodal Transportation Fund for air, marine, rail and public transportation projects.

--	---------	----------------	----------------

The Programs and Economic Analysis Unit Manages the Transportation and Growth Management Program (TGM), the State Planning and Research Program (SPR), Economic Analysis Services for the entire agency, and jointly manages significant projects, initiatives, and projects. These currently include Least Cost Planning, and Tolling Policies and Rules for example. The Unit works closely with other programs such as Flexible Funds, Connect Oregon, and others to help ensure planning program consistency, coordination, and implementation.

The Transportation and Growth Management Program is a joint effort of ODOT and the Department of Land Conservation and Development to integrate transportation and land use planning to create livable communities connected by an efficient transportation network that provides convenient options for travel and commerce. The program provides funding and planning guidance to local jurisdictions.

TRANSPORTATION PLANNING UNIT		
	Interim Manager	Amanda Pietz (503) 986-4227

The Transportation Planning Unit coordinates statewide planning efforts, including production of the Oregon Transportation Plan and the Oregon Highway Plan; coordination of other long-range plans; development of planning and implementation studies; analysis of planning policies and procedures, STIP criteria and process, and provision of guidance and training of implementing:

- The Oregon Transportation Plan;
- The Oregon Highway Plan;
- Corridor and transportation system planning efforts including program/methodology development; and
- The provision of information and support of plans developed in the Regions and local jurisdictions.

The unit provides assistance in interpretation and development of Oregon Administrative Rules and ODOT plans and policies such as the Transportation Planning Rule and State Agency Coordination Program.

TRANSPORTATION PLANNING ANALYSIS UNIT

Manager

Brian Dunn

(503) 986-4103

The Transportation Planning Analysis Unit (TPAU) analyzes the long-range effects of transportation decisions on travel behavior, transportation system performance, land use and the economy to help customers make informed decisions and to maximize resources. The Unit provides transportation analysis services to customers at several levels including: detailed project-specific analysis, broader facility and transportation systems analysis, and analysis of projects and policies at a statewide level. Examples of detailed analyses include project development and intersection analyses for refinement studies and Environment Impact Studies. Facility or system analyses cover a larger area and include corridor studies, urban models, greenhouse gas, air quality and noise analyses, and transportation system plans. Statewide analyses include land use/transport/economic integrated analyses.

Mission: Provide leadership for informed transportation decisions through data collection, analysis, integration and dissemination.

The Transportation Data Section is responsible for monitoring transportation system performance through the National Highway System, Functional Classification, Crash Analysis, Highway Performance Monitoring System and Traffic Counting and GIS programs. The Section provides data management vision, leadership and coordination through the development of standards and training in the use of geospatial data.

CRASH ANALYSIS AND REPORTING UNIT

Manager	Robin Ness	(503) 986-4236
---------	------------	----------------

The Crash Analysis and Reporting (CAR) Unit consists of three crash data programs which provide motor vehicle involved, crash data through data collection, database creation, maintenance and quality assurance, GIS and tabular reports, data extracts and limited database access. The statewide Crash Data System file provides a minimum of ten years of crash data at all times, available both on-line and through data requests. The Fatality Analysis Reporting System (FARS) is a comprehensive file on fatal crashes in Oregon. The Motor Carrier Crash file contains detailed information on commercial vehicle (truck) related crashes.

GEOGRAPHIC INFORMATION SERVICES UNIT

Manager	Brett Juul	(503) 986-3156
---------	------------	----------------

The Geographic Information Services (GIS) Unit provides data, maps, computer applications, training and experience that incorporate geospatial data requirements and design standards in order to support various agency efforts. The unit serves as a geospatial data warehouse, bringing data collections into a single environment, available to the entire agency. This include the development and support of the Oregon Transportation Network (OR-Trans), Environmental Data Management System (EDMS) and Emergency Mapping programs.

ROAD INVENTORY & CLASSIFICATION SERVICES UNIT

Manager

Heather King

(503) 986-4157

The Road Inventory and Classification Services Unit is responsible for: The federally required Highway Performance Monitoring System which is used in Congressional reports to monitor and analyze the overall condition of the national public road system; administration of the Functional Classification (FC) program; collection and maintenance of road information necessary to classify and monitor the highways, roads, and streets within Oregon; the federally mandated Certified Mileage Report which is a factor in distributing certain federal funds; providing mileage statistics; development, maintenance and enhancement of ODOT's corporate data base known as TransInfo; Straightline Charts, which are a lineal representation of the features along highways and are used as a reference to locate attributes along highways; and the State Highway Video Log which is a pictorial record of state highway features from a driver's perspective.

TRANSPORTATION SYSTEMS MONITORING UNIT

Team Leader

Don Crossover

(503) 986-4132

The Transportation Systems Monitoring (TSM) Unit is responsible for the Traffic Monitoring Program, which provides vehicle class and traffic volumes for Federal, State, local and private decision makers. This effort supports project development (design and construction), operations, maintenance, planning, state and regional modeling, and the Highway Performance Monitoring System (HPMS). Data is used both for specific locations (average daily traffic) as well as rolled up for summaries of geographic areas (vehicle miles of travel).

Traffic Monitoring	Tricia Tanner	(503) 986-4159
Traffic Counting Field Coordinator	Lonnie McDonald	(503) 986-3241

TRANSPORTATION DEVELOPMENT, RAIL & PUBLIC TRANSIT DIVISIONS' AUTOMATION UNIT

Manager

Robin Ness

(503) 986-4236

The Automation (AUTO) Unit provides a full range of technology coordination functions for the Transportation Development Division (TDD), Rail and Public Transit Divisions. These services include TDD web page development and maintenance, assisting in the planning purchasing, tracking and installation of workstations and non-computer technology, and coordination of server and local area network needs.
