**Please note: This list is subject to change. New generics may be added as they become available. In rare instances, formulary status of a medication may change or a generic may no longer be manufactured or withdrawn from the market for various reasons (i.e. safety reasons, manufacturer patent litigations, etc.). While market withdrawal of a generic is very rare or change of a medication to a non-formulary status may change, please note that in these cases, the medication would no longer be available at a \$0 copay.**
