

SCORING SHEET
Child and Adolescent Service Intensity Instrument

1. Clinical Level of Care Recommendation
(Assign before using CASII)

2. Calculation of Composite Score

<u>Dimension</u>	<u>Dimension Rating</u> <i>(circle score)</i>				
1. Risk of Harm	1	2	3	4	5
2. Functional Status	1	2	3	4*	5
3. Co-morbidity	1	2	3	4*	5
4. Recovery Environment					
Environmental Stressors	1	2	3	4	5
Environmental Support	1	2	3	4	5
5. Resiliency & Treatment History	1	2	3	4	5
6. Acceptance & Engagement					
Child/Adolescent	1	2	3	4	5
Parent and/or primary care taker	1	2	3	4	5

[Note: please record the higher of the two scores]

Note: Bold indicates independent criteria - requires automatic admission to a higher level of care regardless or combined score. A score of 4 results in placement at level 5 and a score of 5 results in placement at level six.

** = independent criteria may be waived if sum of IVA and IVB scores equals 2.*

COMPOSITE CASII SCORES *(add right column)*

3. Derived Level of Care Recommendation *(Consult Grid and Decision Tree)*

4. Actual (Disposition) Level of Care

Reasons for Deviation from CASII Level of Care Recommendation
