

Board of Cosmetology

The **Board of Cosmetology** consists of six certified practitioners (who are not associated with the manufacture, sale or distribution of cosmetic appliances or supplies) and one public member.

OHLA boards and councils provide profession-specific expertise and consultation but are not responsible for OHLA central agency administration.

OHLA

The **Oregon Health Licensing Agency (OHLA)** is a state department of licensing and regulation. OHLA is unique among Oregon's regulatory agencies — it oversees multiple professions under a central agency administration.

For more information, visit our Web site at www.oregon.gov/OHLA.

Consumer Protection

If you can't resolve a problem or issue with a practitioner or business, OHLA can help.

Contact us at **(503) 378-8667**, ext. 4314 or via e-mail at ohla.info@state.or.us.

We respond to every inquiry and have the authority to take disciplinary action against practitioners and businesses.

Consumer's Bill of Rights

Consumers of services offered by professionals authorized to practice by the Oregon Health Licensing Agency (OHLA) have a legal right to:

- ✦ Receive competent professional services
- ✦ Verify the names, titles and credentials of professionals providing services
- ✦ Receive clear explanations of the services offered and cost for the services
- ✦ Refuse any services offered
- ✦ Receive information on complaints that have resulted in final action
- ✦ File a complaint with OHLA regarding a practitioner, facility, or an unlicensed/uncertified person
- ✦ Request reasonable accommodations to access professional services as outlined in the Americans with Disabilities Act
- ✦ Be treated with courtesy and respect
- ✦ Have service options and consequences explained

Esthetics & AIRBRUSH TANNING

What Consumers & Practitioners Need to Know

OREGON
HEALTH
LICENSING
AGENCY

AIRBRUSH TANNING

Airbrush Tanning

Airbrush tanning is becoming a popular alternative to UV-based (ultraviolet) tanning beds and systems. While more and more evidence points to the dangers of ultraviolet radiation, less is known about the health risks associated with airbrush tanning.

FDA: Only External Use Allowed

The U.S. Food & Drug Administration (FDA) has determined that the most widely used color additive in airbrush tanning solutions — *dihydroxyacetone*, or DHA — is restricted to external application.

While DHA has been approved by the FDA as a tanning additive since 1977, it shouldn't be sprayed in or on the eyes, mouth or nose. FDA officials state that DHA should not be ingested, inhaled or exposed to the eye area or mucous membranes because "...the risks, if any, are unknown."

"Self-Serve" Tanning Booths Not Regulated: Both consumers and practitioners should be aware that spray tanning booths in which the practitioner does not directly apply the tanning solution are not currently regulated. However, precautions (above right) should be heeded to prevent inhalation or ingestion of the spray tanning solution.

Certification Required

Beginning January 1, 2007, all airbrush tanning practitioners must be certified in esthetics to legally practice in Oregon. You must also provide services only in a licensed cosmetology facility.

To gain certification in esthetics, practitioners must graduate from an Oregon private career school and pass practical and written examinations.

For more information on education requirements, visit OHLA's Web site at www.oregon.gov/OHLA/COS, or call us at 503-378-8667.

For a list of private career schools, go to www.ode.state.or.us/teachlearn/specialty/pcs/schooldir.aspx, then click on the **Private Career Schools Directory** link.

DHS Regulates UV-Based Tanning
UV-based tanning devices, usually tanning beds, are regulated by the Department of Human Services, Radiation Protection Services. For more information, go to www.oregon.gov/DHS/ph/rps.

Precautions to Take

The FDA recommends protective measures for the eyes, nose and mucous membranes:

- **Goggles for the eyes**
- **Nose plug for nostrils**
- **Ear plug for ears**
- **Balm or other coating for lips**
- **Keep your mouth closed during service**

Consumers should be offered these protective measures prior to the airbrush tanning service. *Client records must be kept to avoid adverse reactions or infection outbreaks.*

Any of the materials above that come into direct contact with the customer must be either disposed of or cleaned and disinfected between each use.

Avoid Violations

Beginning January 1, 2007, all airbrush tanning practitioners must follow the requirements of certification as specified in **Oregon Revised Statutes** and **Oregon Administrative Rules** for cosmetology, found under Laws & Rules at www.oregon.gov/OHLA/COS.
