

# False Identification

## Program Purpose

To reduce minors' use of altered or forged driver licenses and identification to purchase alcoholic beverages.

## Description

In this program, OLCC partners with licensees to establish a training program to help licensees and their employees recognize false or altered identification. The program fosters a sense of direct participation and satisfaction for licensees in deterring the use of false or altered identification by minors. The OLCC is implementing a recognition program to provide motivational incentive and acknowledgment of licensees' efforts.

In this program, OLCC will:

- ask licensees within a geographic area to participate in the program. OLCC will provide an overview of the program and training offered on identification. The training highlights steps for sellers in recognizing false or altered identification, confiscating such identification, and gathering information for follow-up cases.
- release information to the media explaining the program and announcing participating businesses
- hold training classes for licensees and their employees
- evaluate each case submitted and issue appropriate citations when possible
- forward altered or false identification to DMV for license suspension, if the person who presented the identification cannot be located
- send names of cited people to the local media for publication
- present certificates to licensees who turn in false or altered identifications or who provide effective training for their employees

## Results

OLCC expects an increase in the number of citations issued for misrepresentation of age, attempting to purchase, use of an invalid license and forgery cases. It also expects to see a reduction in the use of altered and false identification presented to purchase alcoholic beverages, as the program continues over time.
