BEFORE THE
OREGON MEDICAL BOARD
STATE OF OREGON

In the Matter of)
STEPHAN ANTHONY AMES, MD) STIPULATED ORDER
LICENSE NO. MD16281)

1.

The Oregon Medical Board (Board) is the state agency responsible for licensing, regulating and disciplining certain health care providers, including physicians, in the state of Oregon. Stephan Anthony Ames, MD (Licensee) is a licensed physician in the state of Oregon.

2.

On October 15, 2013, the Board issued a Complaint and Notice of Proposed Disciplinary Action in which it proposed taking disciplinary action pursuant to ORS 677.205(2), to include the revocation of license, a \$10,000 civil penalty, and assessment of costs against Licensee pursuant to ORS 677.205 for violations of the Medical Practice Act, to wit: ORS 677.190(1)(a) unprofessional or dishonorable conduct, as defined in ORS 677.188(4)(a) and ORS 677.190(13) gross or repeated acts of negligence. A contested case hearing was held on June 17, 18, and 23, 2014.

3.

The Board concludes that Licensee engaged in the following acts and conduct that violated the Medical Practice Act:

On September 24 and 25, 2012, Licensee went to the residence of Patient A, an adult female, to help her pack her family's belongings as they were moving to another residence. Patient A and her husband were long-time friends and patients of Licensee. Licensee found himself alone with Patient A and her two young children for extended periods of time. On September 25, 2012, in response to Patient A's complaints of low back pain, Licensee

1 provided treatment to Patient A by placing his hands upon her back and performing what he
2 has described as an osteopathic manipulative thrust. Licensee breached professional
3 boundaries by remaining alone in the residence with Patient A, and by performing treatment
4 in that setting. Licensee was not adequately trained to provide osteopathic treatment. This
5 treatment did not cause physical harm, but Patient A subsequently suffered emotional distress.

6 4.

7 Licensee and the Board desire to settle this matter by entry of this Stipulated Order.
8 Licensee understands that he has the right to a contested case hearing under the
9 Administrative Procedures Act (chapter 183), Oregon Revised Statutes. Licensee fully and
10 finally waives the right to any appeal in this case by the signing of and entry of this Order in
11 the Board's records. Licensee does not admit, but the Board finds that Licensee engaged in
12 conduct that violated ORS 677.190(1)(a), as defined in ORS 677.188(4)(a); and ORS
13 677.190(13). Licensee understands that this Order is a public record and is a disciplinary
14 action that is reportable to the National Data Bank and the Federation of State Medical
15 Boards.

16 5.

17 Licensee and the Board agree to resolve this matter by the entry of this Stipulated
18 Order subject to the following terms and conditions of probation:

19 5.1 Licensee is reprimanded

20 5.2 Licensee is assessed a \$2,500 civil penalty, payable in full within 60 days from
21 the signing of this Order.

22 5.3 Licensee must complete a course in professional boundaries, it is noted that
23 Licensee has completed such a course.

24 5.4 Licensee, who has an unrestricted license as an allopathic physician to practice
25 in a clinical setting, must not provide any form of treatment to any patient outside of the
26 clinical setting unless he is responding as a Good Samaritan to a life threatening medical
27 emergency.

1 5.5 Licensee may practice as an allopathic physician without restriction, but he has
2 not received formal osteopathic training and must not perform osteopathic manipulations.

3 5.6 This Order terminates the Interim Stipulated Order, dated August 15, 2013.

4 5.7 Licensee stipulates and agrees that this Order becomes effective the date it is
5 signed by the Board Chair.

6 5.8 Licensee must obey all federal and Oregon state laws and regulations
7 pertaining to the practice of medicine.

8 5.9 Licensee stipulates and agrees that any violation of the terms of this Order
9 shall be grounds for further disciplinary action under ORS 677.190(17).

Licensee is a board-certified family practice physician practicing in Grants Pass, Oregon. Licensee's acts and conduct that violated the Medical Practice Act follow:

4.1 The Board reviewed Licensee's treatment of five patients (Patients A – E), which raised serious questions in regard to the manner of the Licensee's overall clinical management of these patients, to include the following: Licensee treated patients with dangerous combinations of controlled substances, specifically methadone (Schedule II), with a benzodiazepine, clonazepam (Klonopin, Schedule IV); Licensee failed to document that he considered and informed the patient of the risks and benefits of the prescribed controlled substances; Licensee failed to provide his patients with written material risk notification during the initial visits; Licensee failed to set goals for treatment or address the efficacy of the treatment provided (to include assessing patient function and pain status) and failed to adequately manage patient progress in follow up clinical visits. After initiating opioid therapy, Licensee failed to conduct effective surveillance measures, to included pill counts and periodic urine drug screens; Licensee's charts failed to address evidence of patient aberrant behavior, and Licensee failed to set forth clinical findings to support the treatment of his patients with opioids in combination with benzodiazepines. In regard to patients receiving testosterone, Licensee failed to establish a diagnosis of hypogonadism and only sporadically checked testosterone levels. Specific examples of substandard care are set forth in the paragraphs below.

4.2 Patient A, a 23-year-old male presented as a new patient to Licensee on January 9, 2014, with a complaint of back pain and "hands numb from the wrist to the elbow." Patient A was a mill worker and reported diverting methadone from a relative. Licensee conducted an examination that was negative for spinal tenderness or misalignment, as well as a negative leg raise test. Licensee did not order a urine drug screen at this time. Licensee made a non-specific diagnosis of back pain and prescribed methadone (Dolophine, Schedule II) 10 mg 3 tablets daily as well as clonazepam 1 mg daily (Klonopin, Schedule IV). This medication was not medically indicated based on Patient A's history and presenting symptoms. Patient A underwent a urine drug screen (UDS) on January 14, 2014, which was positive for methadone, but negative for

1 benzodiazepines (clonazepam). Patient A returned to the clinic on January 24, 2014, requesting
2 an increased dosage of clonazepam (3 or 4 mgs). Licensee added mirtazapine instead of
3 increasing the clonazepam but did not address the absence of clonazepam in the UDS. A second
4 UDS on February 4, 2014, was once again negative for benzodiazepines. Licensee did not chart
5 the absence of benzodiazepines or address this issue with Patient A. Licensee did not stop
6 prescribing clonazepam. Licensee prescribed clonazepam 1 mg, 45 tablets again on April 30,
7 2014, and prescribed methadone, 10 mg, 150 tablets on February 25, 2014, March 26, 2014, and
8 April 25, 2014. Patient A's mother reported that her son was a drug abuser in March 2014, but
9 Licensee did not address this issue with the patient. Licensee had Patient A sign a material risk
10 notification on May 21, 2014, indicating that Licensee recommended "methadone as needed."
11 This nonspecific dosage, in combination with a benzodiazepine, subjected Patient A to the risk of
12 increased sedation and unintentional overdose death. This risk was not specifically addressed in
13 the material risk notice. Licensee continued to prescribe a combination of methadone and a
14 benzodiazepine to Patient A in spite of evidence of drug diversion and possible abuse.

15 4.3 Patient B, a 24-year-old female and girlfriend of Patient A presented to Licensee
16 for the first time on January 27, 2014, with a history of obesity, and reported back pain,
17 headaches and pain in her legs at night. She reported that she "gets better with oxycodone 10 mg
18 3-4/day." Licensee documented a normal physical examination with no positive findings. His
19 assessment included back pain, depression, insomnia and migraine. Licensee failed to conduct a
20 urine drug screen, execute a material risk notification, or check her record of prescription
21 medications from other providers. Licensee charted certain misgivings: "Not sure what her
22 pains are from. Suspect that her night leg aches and paresthesias are from tizanidine or
23 oxycodone or both." Licensee prescribed methadone 10 mg, 1 tablet twice to three times a day;
24 sertraline (Zoloft) 100 mg, 1 tablet a day; and discontinued her prescription of oxycodone and
25 tizanidine. Patient B underwent a UDS on March 19, 2014, that was positive for methadone.
26 Licensee renewed the prescription for methadone on February 26, 2014, March 28, 2014, and
27 April 27, 2014, without seeing Patient B. Licensee did not establish a schedule to see this patient

28 ///

1 on a recurring basis, did not order another UDS, and did not utilize a pain assessment tool to
2 determine if Patient B was benefitting from the therapy.

3 4.4 On June 11, 2013, Patient C, a 57-year-old obese female, presented to Licensee
4 after an absence of three years to re-establish a patient-physician relationship. Patient C was on
5 a high dosage of scheduled medications for chronic pain for an extended period of time, and had
6 a history of substance abuse and of being "fired" from the care of other clinicians. At the time
7 she presented on June 11, 2013, she was being prescribed methadone, 10 mg, 12 tablets a day,
8 OxyContin (Schedule II) 30 mg, 10 tablets daily; diazepam (Valium, Schedule IV) 5 mg, 3
9 tablets a day; and hydrocodone (Schedule III at the time) 10 mg, 40 tablets daily; for a morphine
10 equivalent dose (MED) of 1930. Patient C complained of bradycardia, reported that she was
11 scheduled for a pacemaker, and asked if her medication regimen was part of the problem.
12 Licensee's assessment after a "surprisingly normal exam given her level of narcotics and
13 complaints of pain" included anxiety disorder, atrial fibrillation, back pain, and depression.
14 Licensee did not refer her to a drug treatment center to treat her opioid addiction, did not order a
15 UDS, and did not execute a material risk notification for Patient C, but followed her for "narcotic
16 reduction." On July 16, 2013, Licensee prescribed hydrocodone & acetaminophen 10/325 mg, 1
17 tablet 3 times a day; and methadone 10 mg, 5 tablets twice a day (MED of 1230); and diazepam
18 5 mg, 1 tablet a day. In subsequent clinic visits, Patient C complained of recurring chronic
19 abdominal pain and constipation and was subsequently hospitalized for narcotic ileus. This
20 regimen continued into 2014 with little change. In May of 2014, Patient C's medication regimen
21 included diazepam, 5 mg, 1 tablet 4 times a day; zolpidem (Ambien, Schedule IV) 10 mg, 1
22 tablet daily; hydrocodone & acetaminophen 10/325 mg, 1 tablet 3 times a day; and methadone 10
23 mg, 5 tablets twice a day (MED of 1230). Licensee maintained Patient C on a high dosage of
24 opioids in combination with a benzodiazepine without making appropriate referrals to address
25 her opioid addiction and other debilitating health issues.

26 4.5 Patient D, a 64-year-old male patient, is a long-standing patient of Licensee, with
27 a material risk notice dated September 8, 2004, for the treatment of chronic pain (lumbar
28 spondylosis) with methadone. On February 11, 2010, Licensee was treating Patient D's

1 complaint of ongoing back, leg, and knee pain with methadone 10 mg, 5 tablets twice a day
2 (MED 1200). Licensee failed to set goals for treatment or address the efficacy of the treatment
3 provided (to include assessing patient function and pain status) and failed to adequately manage
4 patient progress in follow up clinical visits. Licensee also failed to conduct effective
5 surveillance measures, such as pill counts or periodic urine drug screens. On February 28, 2013,
6 Licensee was prescribing hydrocodone & acetaminophen, 10/325 mg, 1 tablet 4 times a day
7 #120; methadone 10 mg, 5 tablets twice a day (MED 1240); and testosterone cypionate
8 intramuscular oil 200 mg/ml. At Licensee's direction, Patient D underwent a UDS on May 6,
9 2014, that was positive for methadone, oxycodone, and noroxycodone, but negative for
10 hydrocodone. Licensee did not address Patient D's apparent noncompliance with the medication
11 treatment plan.

12 4.6 Patient E, is a 54-year-old male with a history of a serious motor vehicle accident
13 in 1980 that resulted in a "crushed spine and tight hemipelvis." His ongoing symptoms included
14 knee pain, swelling, and instability in his left knee. Licensee also diagnosed hypogonadism and
15 maintained Patient E on a medication regimen that included opiates and testosterone. Licensee
16 had Patient E sign a medication consent form in 2009. On February 23, 2012, Licensee was
17 prescribing hydrocodone & acetaminophen, 10/325 mg, 1 tablet daily as needed; methadone, 10
18 mg, 1 tablet 4 times as day (MED of 330); and IM injections of testosterone (Schedule III) 100
19 mg. On March 11, 2013, the medication load had increased to hydrocodone & acetaminophen,
20 10/325 mg, 1 - 4 tablets daily; methadone 10 mg, 1 tablet 4 times a day (MED of 360); and
21 periodic injections of IM testosterone 100 mg. Licensee reports that Patient E "is possibly not on
22 chronic pain treatment, although he does take methadone on an irregular basis." Licensee never
23 ordered a UDS, did not update the material risk notification form, and rarely checked Patient E's
24 testosterone level.

25 5.

26 Licensee and the Board desire to settle this matter by entry of this Stipulated Order.
27 Licensee understands that he has the right to a contested case hearing under the Administrative
28 Procedures Act (chapter 183), Oregon Revised Statutes. Licensee fully and finally waives the

1 right to a contested case hearing and any appeal therefrom by the signing of and entry of this
2 Order in the Board's records. Licensee admits that he engaged in conduct that violated ORS
3 677.190(1)(a) unprofessional or dishonorable conduct, as defined in ORS 677.188(4)(a), (b) and
4 (c); ORS 677.190(13) gross or repeated acts of negligence; and ORS 677.190(24) prescribing
5 controlled substances without a legitimate medical purpose, or prescribing without following
6 accepted procedures for examination of patients, or prescribing controlled substances without
7 following accepted procedures for record keeping. Licensee understands that this Order is a
8 public record and is a disciplinary action that is reportable to the National Data Bank and the
9 Federation of State Medical Boards.

10 6.

11 Licensee and the Board agree to resolve this matter by the entry of this Stipulated Order
12 subject to the following sanctions, terms and conditions of probation:

13 6.1 Licensee is reprimanded.

14 6.2 Licensee must pay a civil penalty of \$5,000, payable in full within 180 days from
15 the signing of this Order by the Board Chair. Licensee may make payments of no less than \$500
16 per payment.

17 6.3 Licensee is placed on probation. Licensee must report in person to the Board at
18 each of its regularly scheduled quarterly meetings at the scheduled times for a probationer
19 interview unless directed to do otherwise by the Board or its Compliance Officer.

20 6.4 Licensee must not treat patients for chronic pain. For the purposes of this Order,
21 chronic pain is defined as pain that persists or progresses over a period of time greater than 30
22 days.

23 6.5 Licensee must not prescribe any Schedule II or III medications, or Schedule IV
24 pain medication for acute or intermittent pain for any patient in excess of 60 days in a one year
25 period, and never more than 30 consecutive days. Maximum dose for Schedule II and III
