December 31, 2009

The Oregon Medical Board has recently implemented a new internal database.

As of December 30, 2009, nearly all licensees who have submitted renewal applications and fees have been fully processed by Board staff. New registration certificates have been issued and mailed daily as renewals are completed.

There are a small number of licensees whose renewal applications are still under review by the Board. If a licensee of the Oregon Medical Board has submitted renewal forms and fees prior to December 31, 2009 then the licensee may practice at the status in effect on 12/31/2009, even if s/he has not received a new certificate. The renewal is considered to be in process and will be completed shortly. Staff at the OMB have been working seven days a week to process the incoming license renewal applications. However, staff are unavailable to respond by telephone or email during non-business hours.

To assist those licensees who have not received a new registration certificate or whose license status may be required by others, we have developed a spreadsheet that shows the renewal status of all of our licensees. [Click here](#) to open the spreadsheet.

As of noon on January 2, 2010 the individual license statuses will be updated and available on our Online License Verification website.

We appreciate your patience and understanding through our first on-line renewal.

Kathleen Haley, JD
Executive Director
