

FIRE EXTINGUISHERS

Operating A Fire Extinguisher

PULL the pin: This unlocks the operating lever. Some extinguishers may have other lever-release mechanisms.

AIM low: Point the extinguisher nozzle at the base of the fire.

SQUEEZE the lever above the handle: This discharges the extinguishing agent. Releasing the lever will stop the discharge.

SWEEP from side to side: Moving carefully toward the fire, keep the extinguisher aimed at the base of the fire and sweep back and forth until the flames appear to be out. Watch the fire area. If the fire re-ignites, repeat the process.
