Recreation Provider Roles

Prepared by the Oregon Parks and Recreation Department

Introduction

A variety of local, state, and governmental agencies; and commercial, private, and nonprofit entities have a role in planning for, providing, and managing recreation and open space resources and services in the state of Oregon. The Oregon Parks and Recreation Department has a state mandate to identify and clarify public and private-sector outdoor recreation provision roles in the state. Towards this effort, OPRD gathered role and provision information from each of the major federal and state agencies, county, municipal and special recreation district organizations, and private-sector industry representatives across the state.

Reporting Methods

The reporting method used a Public/Private-Sector Recreation Roles Matrix, where representatives were asked to enter a specific code letter into each matrix box corresponding to the type of recreational resource, facility or service their agency/organization/industry is responsible for providing in Oregon. The code letters used for recording role information included the following:

M = Major Provider	Direct relationship to mission; currently providing facilities; provides substantial share of regional supply.
S = Secondary Provider	A current supplier; is secondary or supportive to its primary mission.
F = Funding only	
L = Licensing	

Public/Private Recreation Roles Matrix

The Public/Private-Sector Recreation Roles Matrix (Table 6.1) is intended as an easy-to-use reference tool for information regarding the different types of recreational resources, facilities and services provided by recreational agencies/organizations in the state of Oregon. Role information included in the matrix was submitted to OPRD from agency/organization representatives in the state.
