

56 of Oregon's 58 hospitals are now enrolled in the Oregon Patient Safety Commission's voluntary and confidential reporting program for serious adverse events.

These 56 hospitals provide over 99% of inpatient care in Oregon. Participating hospitals report detailed information on adverse events to the Commission in a cooperative effort to improve patient outcomes.

The Patient Safety Reporting Program provides opportunities to highlight emerging patient safety issues in the state, identify best practices, and share confidential information in a risk-free way.
