

820-010-0620
Official Seal

(1) Seals, as referenced by ORS 672.020(2) and 672.025(2), must contain the printed name of the registrant, the date of registration, the number of the registrant's certificate of registration, and the registrant's professional title. The registrant's printed name on the seal will be exactly the same as the name printed on registrant's certificate of registration.

(2) The size, design and content of the seal will be an exact replica, in style, of the examples shown in Exhibit 1 (Official Seals) for the profession or branch of the profession in which the registrant is licensed. (A tolerance of 1/4" is permitted as to the size of the seal). The expiration or renewal date may be made part of the seal. If the expiration or renewal date is not made part of the seal, it must be handwritten, in permanent ink, after the word "Expires" or "Renews." Reduced or enlarged seals are not permitted on final documents. In addition to these requirements, registrants will use the following seals:

(a) Professional engineers holding a structural engineering certificate will use the seal with the designation "Structural" above the words "Registered Professional Engineer," as shown in Exhibit 1-b. Other registered professional engineers will use the seal shown in Exhibit 1-a;

(b) Registered professional traffic engineer, who may practice only traffic engineering (*as indicated by the initials "PTE" after their license number*) will use the seal shown in Exhibit 1-f;

(c) Registered professional land surveyors will use the seal shown in Exhibit 1-c;

(d) Registered professional photogrammetrists will use the seal shown in Exhibit 1-d;

(e) Registered water rights examiners will use the seal shown in Exhibit 1-e. [*Exhibits not included. See ED. Note*].

(3) The seal may be applied to a document by rubber stamp or it may be computer-generated onto the document.

(4) The registrant will sign through the middle of the seal or in the place on the seal as indicated for signature, in handwriting, and in permanent ink.

(5) A digital signature, as an option to a handwritten signature in permanent ink is acceptable for final documents.

(a) The digital signature must be:

(A) Unique to the registrant using it; and

(B) Capable of verification; and

(C) Under the sole control of the registrant using it; and

(D) Linked to a document in such a manner that the digital signature is invalidated if any data in the document is changed.

(b) Documents signed using a digital signature will bear the phrase "digital signature" in place of the handwritten signature.

(6) Only individuals registered as professional engineers, professional traffic engineers, professional land surveyors, professional photogrammetrists, or certified water rights examiners may use a seal with a shape, form or wording similar to those shown in Exhibit 1. Using such a seal without registration constitutes falsely representing that the person is authorized to practice the profession.
