SECTION 2 -- SYSTEM CHANGES

INTERSTATE IDENTIFICATION INDEX (III) MESSAGE KEY (MKE) TO UPDATE CRIMINAL HISTORY RECORDS WITH DISPOSITION DATA

AFFECTED BY CHANGE: **III**

EFFECTIVE DATE: **Immediate**

Background

In August 2004, the CJIS Advisory Policy Board recommended a III Disposition (DSP) MKE be developed for the submission of and response to disposition information electronically transmitted to the FBI's Fingerprint Identification Records System (FIRS). This change will enhance the FBI's criminal history record repository and improve information sharing by enabling State Identification Bureaus to update the national repository in a more efficient and timely manner, thus providing criminal and noncriminal justice agencies with more complete information.

TOU 08-1 (February 29, 2008) supplied information on the III DSP MKE. This TOU updates the *III/National Fingerprint File (NFF) Operational and Technical Manual* (December 2005) with information contained in TOU 08-1.

Manual Change(s)

Additions to the Quick Reference, Table of Contents, Appendix A, and Acronyms and Codes portions of the *III/NFF Operational and Technical Manual* (December 2005) are indicated by highlighting, and deletions are indicated by ~~strikeout~~. The information added as Section 7 of Chapter 5 is included in its entirety without highlighting.

CHAPTER 5 - MAINTAINING RECORDS

**SECTION 7 - UPDATING STATE RECORDS WITH DISPOSITION DATA
(DSP UPDATE MESSAGE)**

7.1 INTRODUCTION

The DSP message will enable III states to update criminal history records with disposition data. The DSP may be employed to add, replace, append, and delete disposition data from arrest cycles on state-maintained records. A III state will need to make software changes to its state system in order to transmit electronic disposition updates and receive accept/reject messages related to the updates.

7.2 EXAMPLES OF DSP UPDATE MESSAGES

The following text furnishes examples of DSP update messages, a list of the fields that may be contained in the messages, and the MFCs that must be used. MFCs shown as two hyphens (--) indicate mandatory positional fields not permitting the use of an MFC. If an MFC is used, the III will transmit a reject message.

Messages:

DSP With Single Disposition:

```

| CPL/Guilty 15 Years | Court Provision Literal | CPL |

* Either the FBI or SID Number, or both, may be used as the record identifier. When both are included, III uses the FBI Number as the primary identifier.

Message Format:

2L01HEADERXXXX01234(9-19 characters).**DSP**(3 characters).**MD004445Y**(9 characters).**FBI/9015174**(1-9 characters).**SID/MD81331911**(3-10 characters).**CRI/MD1012600**(1-9 characters).**DMI/A**(1 character).**DOA/20070131**(8 characters).**IFS/X**(1 character).**CCT/01**(1-2 characters).**CON/7399**(4 characters).**COL/Assault**(1-300 characters).**CPL/Guilty 15 years**(1-300 characters)

The Disposition Maintenance Indicator (DMI) is used to indicate the type of disposition maintenance to be performed on a subject's criminal history record. III will enter the default value of "A" when the DMI is not populated. The DMI codes are:

A - Used to add disposition data to a DOA.

D - Used to append disposition data to existing disposition data for a DOA. Only the CPL is updated.

R - Used to replace existing disposition data for a DOA.

X - Used to delete existing disposition data for a DOA.

The IFS value will be displayed within the court segment of the subject's criminal history record. III will enter the default value of "X" when the IFS Field is not populated. The IFS codes are:

C - Used when the subject's record contains no disqualifying conviction (court action).

D - Used when the subject's record contains one or more disqualifying conviction(s), e.g., a felony or misdemeanor crime of domestic violence.

X - Used when the subject's record contains a pending court disposition or when the status of the record is unknown. (This status is also used in cases when a criminal history record has not been reviewed to determine if one of the other two IFFS status flags applies.)

The DSP message will accept up to 10 dispositions for a date of arrest (DOA). Each disposition consists of a Court Count (CCT) and disposition number, Court Offense Numeric (CON), Court Offense Literal (COL), and Court Provision Literal (CPL). If more than 10 dispositions are required for a DOA, a new DSP message must be submitted. The first CCT value in the new message must be greater than the last CCT value in the previous DSP message, i.e., the second DSP message will begin with CCT 11.

III will enter the default value of "7399" when the CON Field is not populated.

The COL must include the original charge when an arrest charge has been amended, changed, or reduced (i.e., Grand Larceny reduced to Petit Theft).

7.3 EXAMPLES OF DSP ACCEPT MESSAGES

"Accept" messages for the DSP update message will always contain the response header characters "KL01" as shown below.

When DSP Includes Only the FBI Number as the Record Identifier

```
KL01HEADERXXXX01234
MD0044445Y
ACCEPT DSP FOR FNU/9015174
```

ALL MFCs SUPPLIED IN THE III DSP REQUEST MAY NOT NECESSITATE UPDATES TO THE III SUBJECT CRIMINAL HISTORY RECORD.

When DSP Includes Only the SID Number as the Record Identifier

```
KL01HEADERXXXX01234
MD0044445Y
ACCEPT DSP FOR SID/MD81331911
```

ALL MFCs SUPPLIED IN THE III DSP REQUEST MAY NOT NECESSITATE UPDATES TO THE III SUBJECT CRIMINAL HISTORY RECORD.

When DSP Includes Both the FBI and SID Numbers as the Record Identifier

```
KL01HEADERXXXX01234
MD0044445Y
ACCEPT DSP FOR FNU/9015174
```

ALL MFCs SUPPLIED IN THE III DSP REQUEST MAY NOT NECESSITATE UPDATES TO THE III SUBJECT CRIMINAL HISTORY RECORD.

When DSP Requires Special Processing

```
KL01HEADERXXXX01234
MD0044445Y
ACCEPT DSP FOR FNU/9015174 or SID/MD81331911
```

ALL MFCs SUPPLIED IN THE III DSP REQUEST MAY NOT NECESSITATE UPDATES TO THE III SUBJECT CRIMINAL HISTORY RECORD.

YOUR TRANSACTION COULD NOT BE AUTOMATICALLY UPDATED -
ROUTED FOR SPECIAL PROCESSING.

When a DSP request requires special processing and is rejected, the III participant will receive notification of the rejection via the U.S. Postal Service.

APPENDIX A - FILE EDIT SPECIFICATIONS

CRI Controlling Agency Identifier - The CRI Field consists of the ORI of the organization controlling the transaction when that organization is different from the organization submitting the transaction. The structure and use of ORIs are provided in the ORI File chapter of the *NCIC 2000 Operating Manual* (December 1999).

DMI Disposition Maintenance Indicator - The DMI Field is an alphabetic indicator which depicts the type of maintenance to be performed on a subject's criminal history record when disposition submission requests are received.

CCT Court Count Number - The CCT Field is a 1-2 character sequential numeric assigned to each court count. Permissible values are 01-40.

CON Court Offense Numeric - The CON is a 4-character arrest offense numeric assigned to court counts to identify the offense committed.

COL Court Offense Literal - The COL is a free-text field to describe an offense charged in a court count. Must contain 1-300 alphabetic, numeric, and/or special characters. First character must not be blank.

CPL Other Court Sentence Provision Literal - The CPL is a free-text field used to describe dispositions and/or sentence provisions. Must contain 1-300 alphabetic, numeric, and/or special characters.
