2. OTHER AGENCY RESOURCES

The emergency responder to either a conflagration, a hazardous materials incident, or other hazard incidents should be aware that there are other agencies capable of providing resources to assist in the response.

The following response information is not intended to be all inclusive, but is for your assistance.

1. STATE AGENCIES

- a. Department of Environmental Quality (DEQ) - For oil and chemically hazardous materials incidents. DEQ can provide information on chemical characteristics, environmental effects, control, cleanup and disposal of hazardous materials. Contact through the Oregon Emergency Response System (OERS) at **1-800-452-0311**.
- b. Oregon Health Division (OHD) - For all incidents involving hazards to human beings and for all communicable disease agents. OHD can provide information on public health effects of hazardous materials including chemical, radiological, physical and biological hazards. Contact through OERS for emergency notification procedures addressing contaminated drinking water, pesticide releases, biological terrorism releases and radiation events for fixed site facilities at **1-800-452-0311**.
- c. Oregon Department of Energy (ODOE) - For radioactive materials transportation incidents. Contact through OERS at **1-800-452-0311**.
- d. Office of State Fire Marshal (OSFM) - For information and guidance on the presence and quantities of hazardous materials at fixed sites, characteristics and hazards of the materials and appropriate control techniques. Contact through OERS at 1-800-452-0311 or directly through duty officer pager at **(503) 370-1488**.
- e. Oregon Department of Forestry (ODF) - For incidents involving the urban/forest interface. Contact at **(503) 945-7434**.
- f. Oregon Emergency Management (OEM) - For incidents in which fire is not the chief concern, but in which fire service personnel may be involved. Contact at **(503) 378-6377 or 1-800-452-0311**.

2. OTHER AGENCY RESOURCES

- a. Poison Control Center - Provides 24-hour toxicological information and medical treatment advice to on-scene responders. Contact **1-800-222-1222**.
- b. Pesticide Analytical Response Center (PARC) - Provides information on pesticide-related (NOT treatment-related) health and environmental exposure from drift or contaminated water. Contact during business hours at **(503)731-4025** or through OERS after hours at **1-800-452-0311**.
- c. Rail Safety Unit, (ODOT) - Can supply information on rail shipments of hazardous materials. Contact during regular business hours at **(503) 378-6204** or through OERS after hours at **1-800-452-0311**.
- d. Oregon Department of Transportation (ODOT) - Can supply information on motor carrier shipments of hazardous materials. Contact during business hours at **(503) 283-5790** or **(503) 378-5916** or through OERS after hours at **1-800-452-0311**.

3. FEDERAL AGENCIES

- a. U.S. Department of Energy, Richland Operations (USDOE) For incidents involving radioactive materials, USDOE can activate response teams to assist state and/or local agencies. Oregon DOE or OHD can activate this help. (See Section 1, State Agencies.)
- b. U.S. Coast Guard - For oil or hazardous materials spills on U.S. waters in the coastal zone, the Coast Guard will respond directly. They will provide the federal on-scene commander and the incident commander. The Coast Guard will be notified of all spills on U.S. waters. The lead state agency will coordinate state support and provide technical assistance to the federal on-scene commander. Local agencies will provide emergency functions such as fire suppression and emergency medical help. Contact through the National Emergency Response Center at **1-800-424-8802**.
- d. Agency for Toxic Substances and Disease Registry - Can supply 24-hour technical advice about the effects of specific materials on public health. Contact at **1-770-452-4100**.

e. US Bureau of Land Management

OR/WA District Fire Management -
Portland Coordination Center - **503-808-6590**

Lakeview	Steve Ellis	541-947-2177
Burns	Tom Dyer	541-573-4400
Vale	Dave Henderson	541-473-3144
Prineville	Barron Bail	541-416-6700
Salem	Dennis Williamson	503-375-5643
Eugene	Julia Dougan	541-683-6600
Roseburg	Cary Osterhaus	541-440-4930
Medford	Ron Wenker	541-618-2415
Coos Bay	Sue Richardson	541-756-0100
Spokane	Joe Buesing	509-536-1200

Oregon State Office – Chief, Fire & Aviation Management – Leo Sidebotham
(503) 808-6590.

4. PRIVATE INDUSTRIES

- a. CHEMTREC - An off-scene 24-hour information service operated by the Chemical Manufacturers Association Chemical Transportation Emergency Center. CHEMTREC can supply chemical and safety data as well as contacts to product manufacturers. It can also activate CHLOREP and CHEMNET, as well as response teams for pesticides, hydrogen cyanide, hydrogen fluoride, phosphorus, and liquefied petroleum gas (LPG). Contact at **1-800-424-9300**.
- b. CHLOREP - A team for chlorine incidents currently fielded by the Pennwalt Corporation in Portland. Contact directly at **(503) 228-7655** or through CHEMTREC at **1-800-424-9300**.
- c. CHEMNET - An industry-wide mutual aid program activated by the shipper. Contact through CHEMTREC at **1-800-424-9300**.
- d. Association of American Railroads - Through their Bureau of Explosives, the Association can offer 24-hour information for incidents involving the railroads. Contact at **(202) 639-2222**
- e. Clean Rivers Cooperative - A non-profit organization of petroleum companies which contracts to control and clean up oil spills on the lower Columbia and Willamette Rivers.

5. VOLUNTEER SERVICES

- a. American Red Cross - Can offer emergency relief in the form of food, shelter and clothing. Nearest office can be contacted through listings in the yellow pages.
- b. Salvation Army - Can offer emergency relief in the form of food, shelter and clothing. Nearest office can be contacted through listings in the yellow pages.
- c. Amateur Radio Emergency Service- Can provide radio communications through a network of amateur radio operators. Contact through the local emergency services director/coordinator.
