

**FIRE
WARNING**

**LOOK BEHIND YOUR TV AND
YOU MIGHT BE SURPRISED.**

VCRs, DVDs, surround-sound systems, cable modems, game players and big-screen TVs may all be plugged into one outlet. It takes just one short circuit or an overloaded outlet to start a fire in your home. Take the time to check your plugs and wiring. It can be the difference between losing more than just the remote.

A Message from the Oregon Life Safety Team: A Coalition of
Fire Service, Community and Insurance Professionals

**HOME FIRE
SAFETY**

IS UP TO YOU!
