

No more firewood to split ...

A great way to start the summer

Never stack firewood against the side of your home or a wooden fence. A woodpile can become kindling for a wildfire.

- **Move your woodpile at least 30 feet from your home.**
- **Take the time now to clean tree debris from your roof and gutters.**
- **Cut back any overhanging branches**
- **Remove overgrown vegetation around the home.**

Simple, yes. Just a few things you can do to make your home and neighborhood safer.

Home Fire Safety is Up to You!
